## Centre for Prehospital Care

Health Sciences North

# INTRODUCTION

On behalf of the staff and Medical Directors of Health Sciences North Centre for Prehospital Care (HSN CPC), it is our pleasure to present the annual report for fiscal year 2016-2017.

This report follows the template provided by the Emergency Health Services Branch, and demonstrates how our organization addresses the key performance indicators listed in the performance agreement.

We have completed another productive and successful year. Some key achievements during this fiscal year include:

- We certified 61 new paramedics
- We provided advice and on-line medical direction during 448 patch calls
- We audited 6053 ambulance calls
- We facilitated 136 educational sessions

We acknowledge the work of all our staff as we continue to seek new and innovative methods of delivering our services to our stakeholders while meeting and, in some cases, exceeding the expectations defined in our performance agreement.

DR. JASON PRPIC  
REGIONAL MEDICAL DIRECTOR

NICOLE SYKES  
REGIONAL MANAGER

# OUR MISSION AND VISION

## Our Mission

The HSN Centre for Prehospital Care fosters exceptional prehospital care to improve the health and wellbeing of our communities by supporting paramedics through:

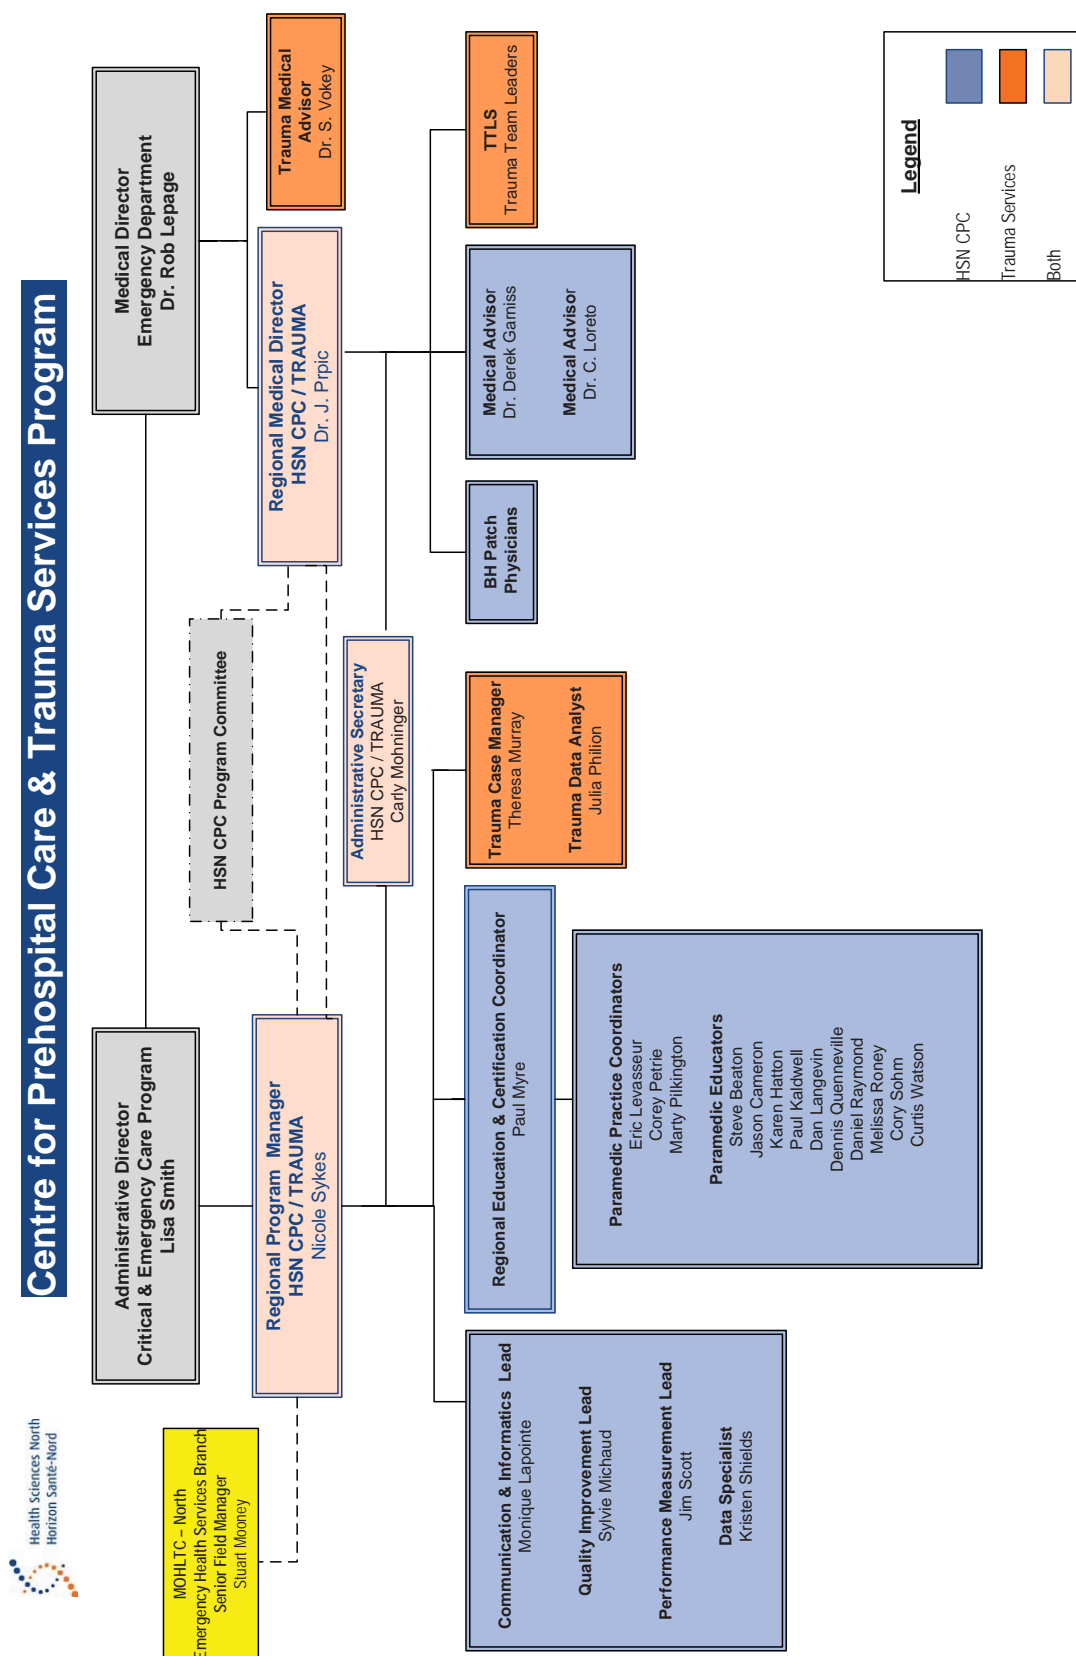

- Innovative education delivery;
- Research;
- Responsive quality programming; and,
- Medical delegation and oversight consistent with approved standards and expert practices.

## Our Vision

Leading advancements in prehospital medicine through innovation, research, and education.

As of March 31, 2017

Revised: March 31, 2017

# MEET THE TEAM

Nicole Sykes,  
Regional Manager

Dr. J. Prpic, Regional  
Medical Director

Paul Myre, Regional  
Education and  
Certification  
Coordinator

Carly Mohninger,  
Administrative  
Secretary

Sylvie Michaud,  
Quality Improvement  
Lead

Monique Lapointe,  
Communication &  
Informatics Lead

Jim Scott,  
Performance  
Measurement Lead

Eric Levasseur,  
Paramedic Practice  
Coordinator

Marty Pilkington,  
Paramedic Practice  
Coordinator

Corey Petrie,  
Paramedic Practice  
Coordinator

Cory Sohm,  
Paramedic Practice  
Coordinator

Kristen Shields,  
Data Specialist

# HIGHLIGHTS

## Collaboration

Working with our colleagues from the Ontario Base Hospital Group (OBHG), the program has had a strategic focus on enhancing the quality of programming delivered, avoiding duplication in the system, and the sharing of knowledge among programs. The goal is to standardize and find efficiencies in processes wherever possible. The Health Sciences North, Centre for Prehospital Care (HSN CPC) team is involved in both formal and informal activities designed to accomplish these goals. These examples illustrate the significant degree to which the program supports a culture of collaboration when considering any new initiatives.

### *Informal Activities*

1. Creating PCP and ACP new scenarios for use with all new certification events through a Provincial Working Group in collaboration with Sunnybrook Centre for Prehospital Medicine, London Health Sciences Centre, Hamilton Health Sciences, Northwestern Ontario Regional Base Hospital, ORNGE Base Hospital
2. Ad hoc sharing of educational materials among Base Hospital programs.
3. Ad hoc sharing of information and resources among Base Hospital Programs.

### *Formal Activities*

#### **Emergency Childbirth Medical Directive**

A joint business case for the delivery of the emergency childbirth medical directive education was submitted by all eight Base Hospital Programs in 2016, led by Tim Dodd (CPER) and Maud Huiskamp (Sunnybrook). With the support of EHSB, this has resulted in an agreement with the Association of Ontario Midwives (AOM) who developed the OBHG MAC endorsed curriculum and evaluation tools to measure competency related to the new ALS PCS medical directive. All ~9000 paramedics in Ontario will receive standardized education, created by out-of-hospital childbirth experts, prior to the Medical Directive implementation date of December 2017.

Medical Directors and key educators from across Ontario attended the Emergency Childbirth Instructor Workshop facilitated by the AOM during the OBHG annual meeting in Niagara Falls on Feb 28 2017. Dr. Prpic, Dr. Garniss and Paul Myre attended on behalf of HSN CPC.

## New Certification

Dates and available spots during PCP and ACP performance based evaluation events are being shared with neighboring Base Hospital Programs. This has resulted in occasions where paramedics requiring evaluation are able to be accommodated on dates or in locations that enable quicker response times to the given need, or to avoid significant human resource investment to duplicate an already offered service in response to a necessary evaluation event for a single paramedic.

## IQ EMS

Health Sciences North Centre for Prehospital Care, London Health Sciences Centre, Southwest Ontario Regional Base Hospital Program and Sunnybrook Centre for Prehospital Medicine continue to work collaboratively pursuing standardization of quality assurance software and working toward the delivery of a centralized data quality management solution using Intelligent Quality Evaluation & Management Suite (IQ EMS), originally developed by Sunnybrook Centre for Prehospital Medicine. This web based software supports the management of many base hospital continuing quality improvement endeavors including data mining, peer review and compliance auditing, secure communication with stakeholders, investigation and self-reporting, efficient work flow and document management, statistical reporting and data visualization. The IQEMS suite is being modified to support the additional base hospitals participating in this large-scale project.

IQEMS will be moved to the centralized infrastructure to facilitate the centralized solution upon completion of the requirements of the Privacy Impact Assessment (PIA) and Threat Risk assessment (TRA). Both the PIA and TRA were completed in 2016 by third party experts, and since the beginning of 2017 the programs have been completing the resulting action items and contracts.

The following formal working groups have been struck to support the deployment of IQEMS:

- IQEMS Project Management group
- IQEMS Operational working group
- IQEMS Technical working group

Additional governance development is ongoing and a policy/privacy working group and the evolution of the Project Management group into an Executive level committee are anticipated in 2017.

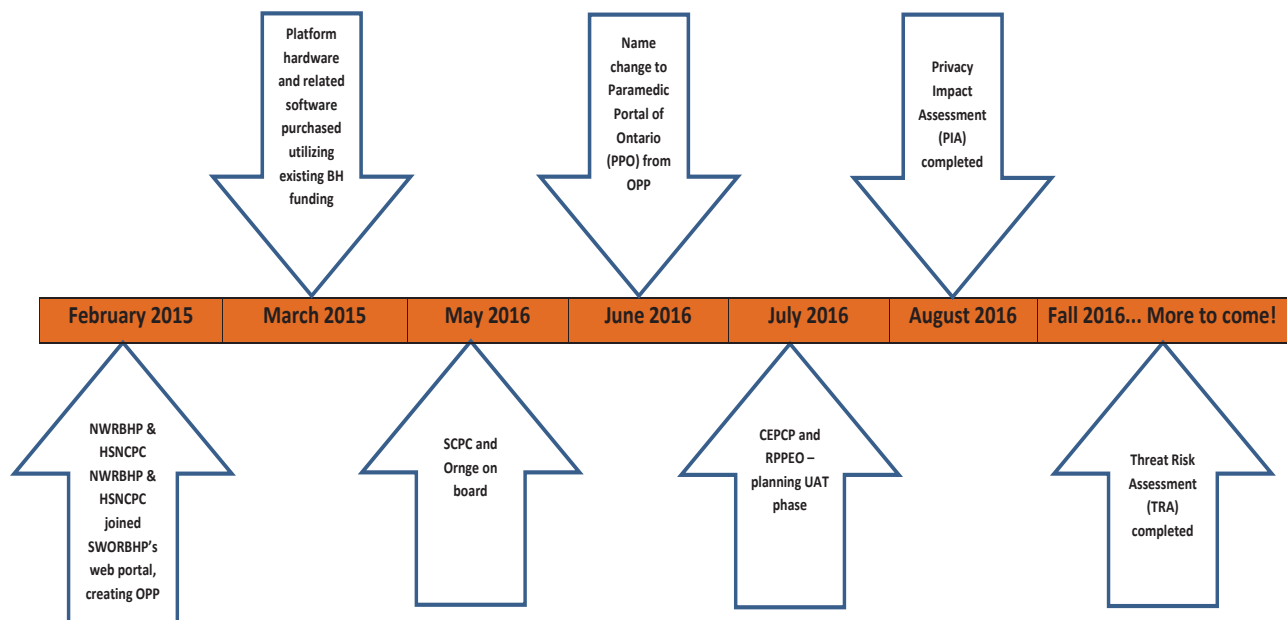

The projected go live was delayed due to recommendations which required addressing based on the Privacy Impact Assessment Report. We anticipate a new go live date for later Summer 2017.

## Paramedic Portal Ontario (PPO) New name and New web address

In 2014 OBHG underwent a review of two actual operational Paramedic Certification and LMS products being utilized in Ontario, the products were scored by the Base Hospital programs as well as evaluated by an independent third party technology expert. As a result, SWORBHP's web portal was chosen in 2015 to be the base of a new, multi-program registry and learning management system (LMS). All development and maintenance has been either developed internally or through a third party utilizing existing BH funding. Centralized infrastructure (monthly hosting & server costs), bug and enhancement resolution as well as regular maintenance/support are being shared equally by all participating BHs.

The Paramedic Portal of Ontario (PPO) completed another phase of development which included upgrades to reflect our current work and future vision and included a new name and web address. The live site now includes 5 of 8 Base Hospitals including Health Sciences North, Centre for Prehospital Care, Northwest, Southwest, Sunnybrook, and ORNGE. A vulnerability risk assessment as well as penetration testing was conducted on PPO and the reporting findings are being addressed as part of this phase. Following the deployment of the new name, development began on the requirements for the next phase. The next version of the PPO will include exciting developments for the paramedic, service operator and administrative staff which will include enhanced reporting and dashboards.

### Milestone Timelines

The PPO allows users access to the Paramedic Registry and the Learning Management site.

The paramedic registry module allows the paramedic/employer and RBHP to:

- Review paramedic current certification status,
- View paramedic auxiliary medical directives authorization
- Print paramedic current certification letter,
- Update paramedic demographics
- Manage continuing medical education (CME).
- Submit CME requests for approval and upload the associated supporting documentation

The Learning Management System (LMS) module allows access to online courses.

The Learning Management System allows the paramedic to:

- Electronically book into CME days.
- Access a variety of on line courses e.g. mandatory CME precourse, auxiliary medical directives, mind of the medical director recordings, PCP IV precourse materials.

**Are you experiencing login issues?**

The Paramedic Portal Of Ontario is a new website which we launched in March 2014.

We have integrated the Paramedic Registry and Online Training Website into one single system.

Since this is a new system, your old login will not work when logging into the new web portal.

If this is your first time logging into the web portal, then you will need to create a new account.

## Certification Standard Project

All eight Base Hospital programs are developing procedures and processes to implement the ALS PCS Certification Standard in a standardized fashion across Ontario. Several Base Hospitals have taken the lead on a specific component of the project and all have signed on to a broader Project Charter.

## Paramedic App: Ontario Paramedic Clinical Guide

All eight Base Hospital Programs participated in an App working group to establish and enhance an electronic clinical reference platform. The App was deployed in January 2017 with positive anecdotal feedback. The next steps of this project will include: a formal evaluation process through an on-line survey for all users and updating of content to support the ALS PCS V4.0 which comes in effect July 1 2017.

Further development will occur based on the feedback received and requirements identified by the App working group.

## Professional Development

### Council of Licensure, Enforcement and Regulation (CLEAR)

Congratulations to Corey Petrie, Paramedic Practice Coordinator who successfully completed the CLEAR National Certified Investigator & Inspector Training Basic course. Having this enhanced knowledge will be of great benefit to the program as investigating clinical cases is one of the core deliverables of the program under the Performance Agreement.

During the three-day, hands-on training and certification program in investigation and inspection techniques and procedures the following topics were covered:

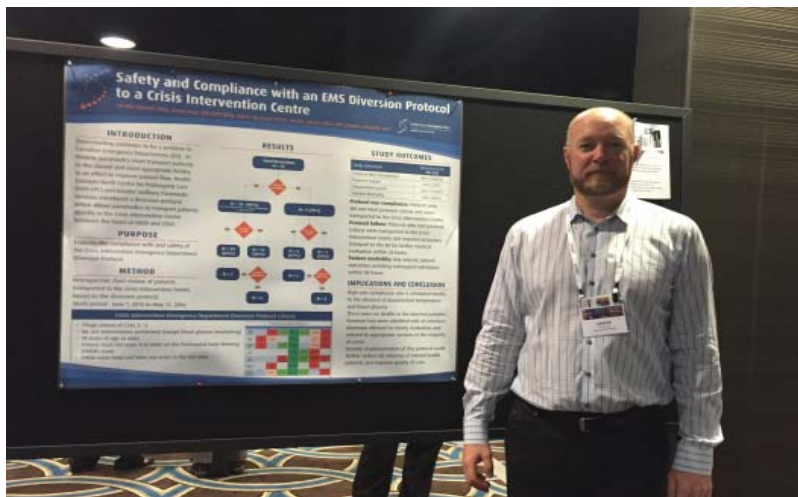

- Professional Conduct: Learn how to develop professional attitudes, conducts and relationships with other regulatory and law enforcement agencies.
- Principles of Administrative Law & the Regulatory Process: Provides the basic guidelines to understanding administrative law and procedure and the regulatory process.
- Investigative Process: Teaches a basic understanding of the investigative process including the intake of complaints, investigative planning and the execution of an investigative plan.
- Investigator Safety: Provides students with an over view of safety concerns for investigators, and high level strategies to mitigating danger.
- Principles of Evidence: Reviews sources of evidence law, types and forms of evidence and the rules and use of evidence in administrative proceedings.
- Evidence Collection, Tagging & Storage: Furnishes the student with basic guidelines for gathering evidence, including proper techniques of custody and storage of evidence.
- Interviewing Techniques: Explains the proper interviewing method, how to establish rapport, and proper and improper questioning techniques.
- Overview of Inspections & Inspection Procedures: Reviews the inspector's role and the specific steps of an inspection; from planning and conducting the inspection to writing the formal report.
- Report Writing: Teaches students ways to improve factual, investigative reports. Learn how to write a report that is accurate, logical, clear, concise and complete.
- Testifying in Administrative & Criminal Proceedings: Provides students with an understanding of the role of the prosecutor, as well as mental and physical preparation for testifying on the witness stand.

Corey adds his new skills to already certified HSN CPC staff members: Sylvie Michaud, Marty Pilkington, Dan Langevin and Jim Scott.

## National Association of Emergency Medical Services Physicians (NAEMSP)

The NAEMSP group impacts EMS internationally and HSN CPC has been an important participant in ensuring the Canadian perspective is considered. The number of Canadians that attend the conference has grown appreciably over the last several years to the point where we now have a distinct NAEMSP committee that represents EMS from across Canada. This committee discusses and advances EMS science as it relates to Canada including participation in the NIH and Health Canada funded Resuscitation Outcomes Consortium (ROC), STEMI care, and the Canadian Evidence-based Protocol Project through a “Distinctly Canadian” pre-conference workshop that is included again. HSN CPC staff members Nicole Sykes and Paul Myre in fact participated on the planning committee for this event in previous years.

Dr. Prpic attended the 2017 National Association of EMS Physicians (NAEMSP) Annual Meeting and Scientific Assembly, in New Orleans, Louisiana and presented research on the diversion protocols developed and being used in Sudbury. (See Research section for further detail.)

## September 2016

### Governor General's Award for Paramedicine

Paul Myre and Eric Levasseur have been given the Governor General's Emergency Medical Services Medal for Exemplary Service.

The award is given to paramedics who have completed at least 20 years of exceptional service, including at least 10 years in the performance of duties involving exposure to harm.

Myre and Levasseur received their awards at the Annual General Meeting of the Ontario Association of Paramedic Chiefs.

Presenting the awards was Lieutenant General Richard Rohmer, one of the most decorated citizens in Canadian history. Rohmer served in the Canadian military as a pilot and took part in the D-Day invasion during the Second World War. He is a recipient of the Order of Canada, Order of Ontario, Order of Military Merit, and holder of the Distinguished Flying Cross.

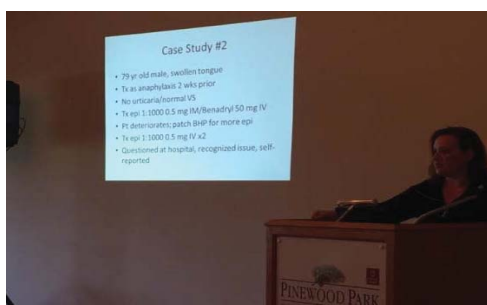

From left to right: Nicole Sykes, Regional Manager of Centre for Prehospital Care and Trauma Services, Eric Levasseur, Paramedic Practice Coordinator, Lieutenant General Richard Rohmer, Paul Myre, Regional Education and Certification Coordinator, Lisa Smith, Director of Critical and Emergency Care Program, Health Sciences North

Sylvie Michaud, Quality Improvement Lead of the Centre for Prehospital Care received a recognition Award from the Ontario Base Hospital Group for 15 years of Service!  
*March 2017*

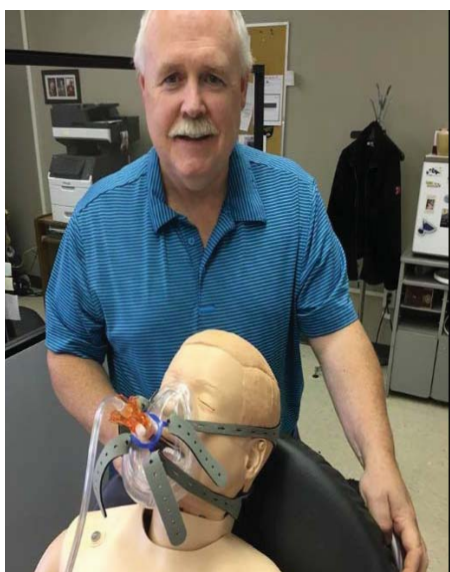

The flags were raised to celebrate the opening of the new EMS Station in North Bay.  
*September 2016*

Nicole Sykes, Regional Manager, educating paramedics about *Just Culture* at the Nipissing Symposium  
*October 2016*

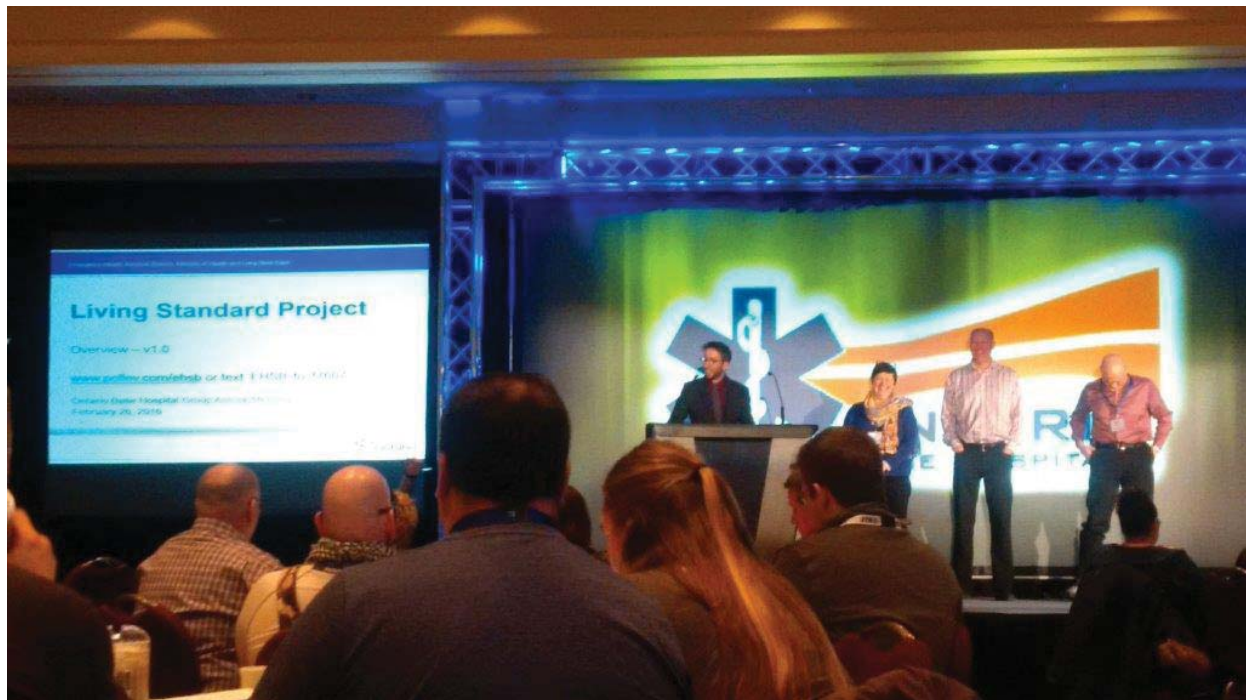

Nicole Sykes, Regional Manager in Attawapiskat  
*April 2016*

Marty Pilkington, Paramedic Practice Coordinator, Timmins Site is featured in *Humans of HSN*  
*September 2016*

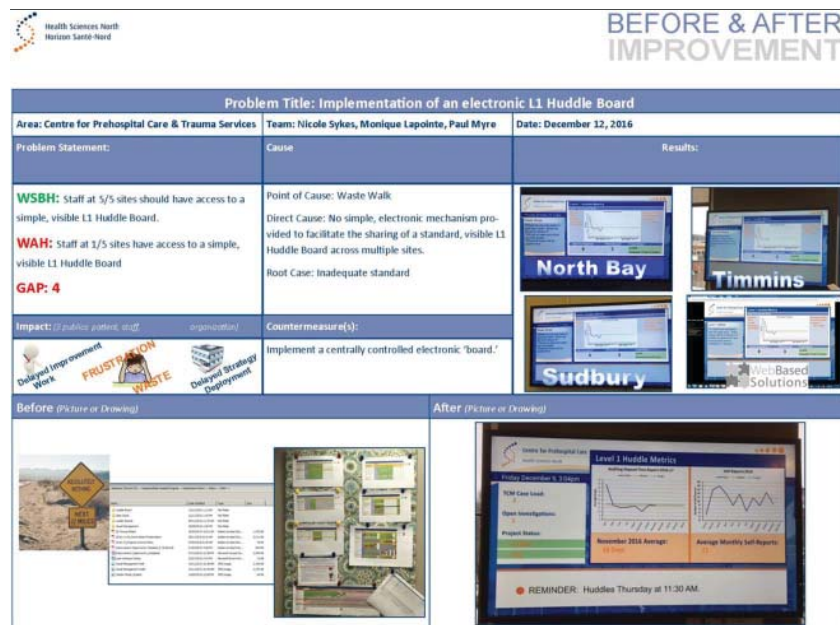

Nicole Sykes, Regional Manager of the Centre for Prehospital Care, along with Rob Smith, Chief of Manitoulin-Sudbury Paramedic Services spoke about Just Culture and a Collaborative Culture on March 2nd, 2017 at the OBHG Annual General Meeting and Conference

Dr. Prpic took part in a panel presentation on the Ministry of Health and Long Term Care - Emergency Health Services Branch's Living Standards Project at the OBHG Annual General Meeting and Conference in Niagara on the Lake in March 2017,

## Centre for Prehospital Care goes LEAN

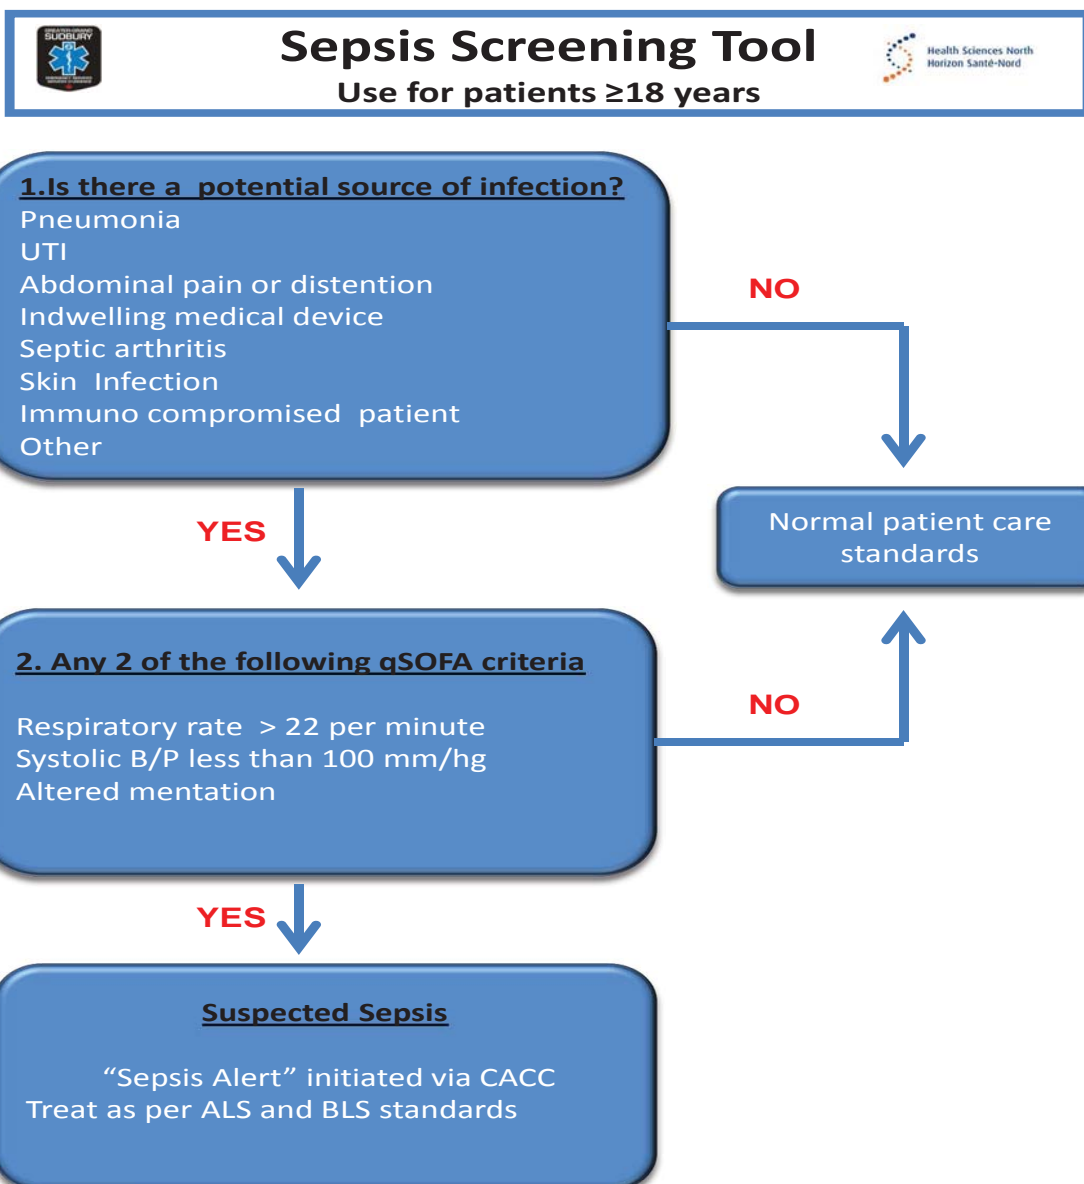

The Centre for Prehospital Care has been on the road of cultural transformation by adopting LEAN methodologies. CPC will continue to be an active participant and leader in the North, working with system partners in developing and/or executing joint, collaborative and complimentary quality improvement initiatives to improve integration and continuity of care for the population that we serve.

## June 2016

### Sepsis Alert Protocol

Severe sepsis is a condition with a high mortality rate. It is estimated that approximately half of the patients seen in the ED with sepsis are transported by Paramedic Services. This group of patients could benefit greatly from timely prehospital care. As a result, Health Sciences North Centre for Prehospital Care (HSN CPC) and Greater Sudbury Paramedic Services (GSPS) introduced a “Prehospital Sepsis Alert”. In June of 2016, we hypothesized that pre-notifying the hospital of critically ill patients will allow hospital staff time to prepare and deliver timely medical care. Through research conducted by Dr. Yves Vaillancourt and Dr. Jason Prpic, in collaboration with HSN CPC staff, we have been able to show a clinically and statistically significant reduction in the time to antibiotic administration with the implementation of the Sepsis Alert protocol.

## Web-Based Self-Reporting Continues to Rise

The HSN CPC strongly believes that self-reporting of adverse events is not only professional but developmental and has become part of our paramedics' standard of practice.

The simple fact of recognizing an event means that some form of self-remediation has taken place. From a program prospective, we look for trending issues and develop regional education based on actual needs. Located on the HSN CPC website, the Paramedic Self-Reporting tool was launched in April 2014 and the activities continue to impress. There were 134 self-reports generated and reviewed in fiscal 2016/2017.

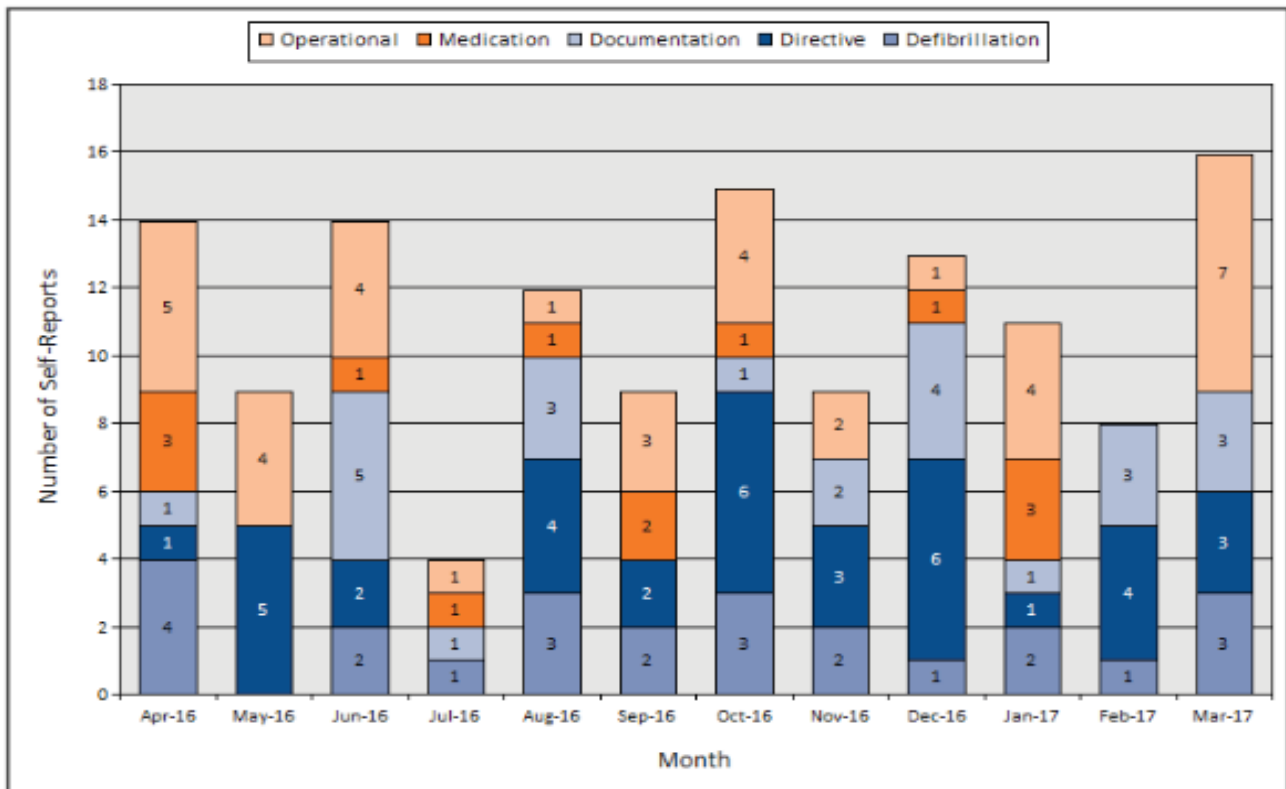

This report currently resides on the HSN Centre for Prehospital Care Program website and is updated on a monthly basis.

Self-reports may include, but are not limited to, medical directive variances, documentation omissions or any challenges a paramedic may encounter during a call. The Self-Report form does not replace the option of contacting a Paramedic Practice Coordinator (PPC) for discussion, however serves as a standardized method of reporting.

### Self-Reports by Month/Identified Issue

April 1, 2016 to March 31, 2017

n = 134

## STEMI Alert

The Heart and Stroke Foundation of Canada estimates 70,000 heart attacks occur in Canada every year which equates to one every seven (7) minutes. STEMI (ST Segment-Elevation Myocardial Infarction) is representative of the most severe type of heart attack involving a sudden blockage of one of the coronary arteries. The HSN Cardiodiagnostics and Emergency Department (ED), in collaboration with the HSN CPC, the City of Greater Sudbury Paramedic Service, and Manitoulin-Sudbury Paramedic Services utilize a protocol whereby when a STEMI is recognized in the pre-hospital setting, a “STEMI ALERT” is immediately declared by attending paramedics. This declaration triggers the pre-notification of the receiving department, either the ED or the Cardiac Catheterization Laboratory (Cath Lab), activating a series of intra-departmental processes where resources are rapidly deployed and focused on preparing for definitive interventions. This protocol drastically reduces diagnosis to intervention times by allowing the receiving departments to prepare for the patient's arrival and streamline the continuum of care.

The standard of care for patients receiving an urgent primary Percutaneous Coronary Intervention (PCI) in the Cath Lab is a door to balloon time of ninety (90) minutes. The door to balloon time is measured from the moment a STEMI positive patient enters a health care facility to the time the balloon in the Cath Lab is inflated.

## Distance Education

We continue to provide education to over 726 paramedics across one of the largest geographical regions in Ontario. To meet the challenge, HSN CPC continues to experiment with different methods of education delivery such as via Adobe Connect, Personal Videoconferencing (PC VC), Social Media and the Ontario Paramedic Portal. The newer methods of delivery allow HSN CPC to enhance learning opportunities and facilitate the delivery of education allowing ease of access by paramedics. OTN videoconferencing continues to allow the connectivity by the Northeast Region Paramedics to the Base Hospital for real time educational, certification and administrative purposes. We currently have 25 archived presentations that paramedics can view from anywhere with an internet connection at any time.

HSN CPC continues to work on solutions to further reduce barriers of time and distance for paramedics to participate in a higher level of learning regardless of their location.

## Social Media

At HSN CPC, we monitor our social media stats to ensure continuous engagement from our paramedics and community. Our page likes have increased by 11% from 2015-16 to 2016-17 fiscal years (Figure 1 & 2). Over half (59%) of our audience are between the ages of 25 to 44 years and 45% of our followers are women and 54% are men. The majority of our audience is from Northeastern Ontario. (Figure 3)

We continue to monitor and develop our Facebook site to ensure the highest engagement of our posts.

# RESEARCH

## Epistry Epidemiologic Registry

Epistry is an epidemiologic databank intended to help understand the burden of out-of-hospital cardiac arrest and life-threatening traumatic injury and to shed light on whether and how EMS process and geographic, socioeconomic and periodic variation may be associated with differences in outcome. The Epistry is designed to collate high-quality comprehensive Emergency Medical System (EMS) based data using uniform standardized criteria for consecutive cases of cardiac arrest and traumatic injury within the Resuscitation Outcomes Consortium (ROC). Epistry data collection commenced December 1, 2005. An approximate 20,000 episodes were enrolled in Epistry in the first year alone. The aims of Epistry include

1. Establish a comprehensive ongoing data infrastructure to facilitate the design, implementation, and interpretation of ROC interventional trials.

Define the incidence and outcome of out-of-hospital cardiac arrest and traumatic injury.

2. Describe the relationships between resuscitation performance and EMS structure, adjusting for episode-specific factors.
3. Evaluate the relationships between outcome and patient, EMS, regional, and periodic factors.

| NUMBER OF CASES APRIL 1, 2016 - MARCH 31, 2017 |     |
|--|-----|
| Patients requiring treatment                   | 164 |
| Patients not requiring treatment               | 179 |

## Safety and Compliance with an EMS Direct Transport Protocol to a Withdrawal Management Facility vs. Emergency Department

*Verdah Bismah, Queen's University, Jason Prpic, Sylvie Michaud, Nicole Sykes, Paul Myre, Health Sciences North Centre for Prehospital Care*

Background: Transportation to alternative destinations (diversion) has been proposed as part of a resolution to overcrowding in hospital emergency departments (ED). We aimed to evaluate compliance and safety of an EMS protocol allowing paramedics to transport medically stable intoxicated patients to an alternate facility, Withdrawal Management Services (WMS). Patients were eligible for diversion if they were  $\geq 18$  years old, scored  $<4$  on the modified Prehospital Early Warning (PHEW) score, and did not have any vital sign parameters in the red zone (as per PHEW score criteria). We hypothesize this protocol is safe for the prehospital diversion of intoxicated patients. Methods: A retrospective analysis was conducted on patients presenting to EMS with alcohol intoxication from June 1, 2015 to May 31, 2016. Study outcomes were: missed protocol opportunities, protocol noncompliance, protocol failure (presentation to ED within 48 hours of appropriate diversion), and patient morbidity (hospital admission or adverse event within 48 hours of diversion). Data was abstracted from EMS reports, hospital records, and WMS discharge forms. Data was analyzed using proportions and 95% confidence intervals. Results: EMS responded to 681 calls for intoxication, 568 were taken to the ED and 113 were diverted. Of the 568 transported to ED, 65 (11%) could have been diverted to WMS, these are cases of missed protocol opportunity. Of the 113 diversions, there was protocol noncompliance in 41 cases (36%), but 35 were due to incomplete sets of vital signs. Another 5 (12%) diversions involved vital signs documented outside allowed limits. 8 patients (20%) from the protocol noncompliance group presented to ED within 48 hours of diversion, none were admitted. Protocol failure occurred in 16 patients (22%), of which 1 was admitted. Overall, 24 patients (21%) presented to the ED after diversion, and 1 (1%) was admitted. Conclusions: EMS providers had high protocol compliance when transporting patients directly to the ED. There was some protocol non-compliance in diverting patients to WMS, largely attributed to incomplete recording of vital signs. The protocol causes low levels of morbidity in diverted patients. Broader implementation of the protocol could reduce the volume of intoxicated patients in the ED.

# Safety and Compliance with an EMS Diversion Protocol to a Withdrawal Management Centre

Centre for Prehos | Care

## INTRODUCTION

Overcrowding continues to be a problem in Canadian Emergency Departments (ED). In Ontario, paramedics must transport patients to the closest and most appropriate facility. In an effort to improve patient flow, Health Sciences North Centre for Prehospital Care (HSN CPC) and Greater Sudbury Paramedic Services introduced a diversion protocol which allows paramedics to transport patients directly to the Withdrawal Management Centre.

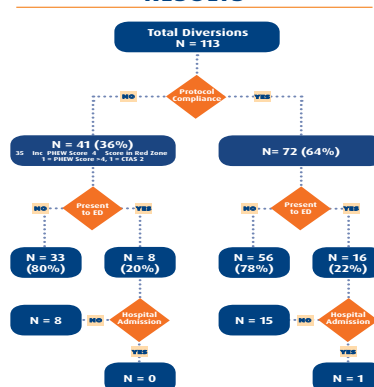

## PURPOSE

Evaluate the compliance with and safety of the Withdrawal Management Emergency Department Diversion Protocol.

## METHOD

Retrospective chart review of patients transported to the Withdrawal Management Centre based on the diversion protocol.  
Study period : June 1, 2015 to May 31, 2016

## RESULTS

## STUDY OUTCOMES

| Study Outcomes          | Diverted to CI<br>(N=45) |
|-------------------------|--------------------------|
| Protocol Non-Compliance | 36% (41/113)             |
| Protocol Failure        | 22% (16/72)              |
| Presentation to ED      | 21% (24/113)             |
| Patient Morbidity       | 1% (1/113)               |

**Protocol non-compliance:** Patients who did not meet protocol criteria and were transported to the Withdrawal Management Centre.

**Protocol failure:** Patients who met protocol criteria were transported to the Withdrawal Management Centre and required secondary transport to the ED for further medical evaluation within 24 hours.

**Patient morbidity:** Any adverse patient outcomes including subsequent admission within 48 hours.

## IMPLICATIONS AND CONCLUSION

High non-compliance rate is attributed mostly to the absence of documented temperature and blood glucose.

There were no deaths in the diverted patients and one hospital admission for an unrelated issue.

Diversion allowed for timely evaluation and referral to appropriate services in the majority of cases.

Broader implementation of this protocol could further reduce ED volumes of patients under the influence and improve quality of care.

### Withdrawal Management Emergency Department Diversion Protocol Criteria

- Triage criteria of CTAS 3 - 5
- No ALS interventions performed (except blood glucose monitoring)
- 18 years of age or older
- Patient must not score 4 or more on the Prehospital Early Warning (PHEW) score
- PHEW score must not have any score in the red zone

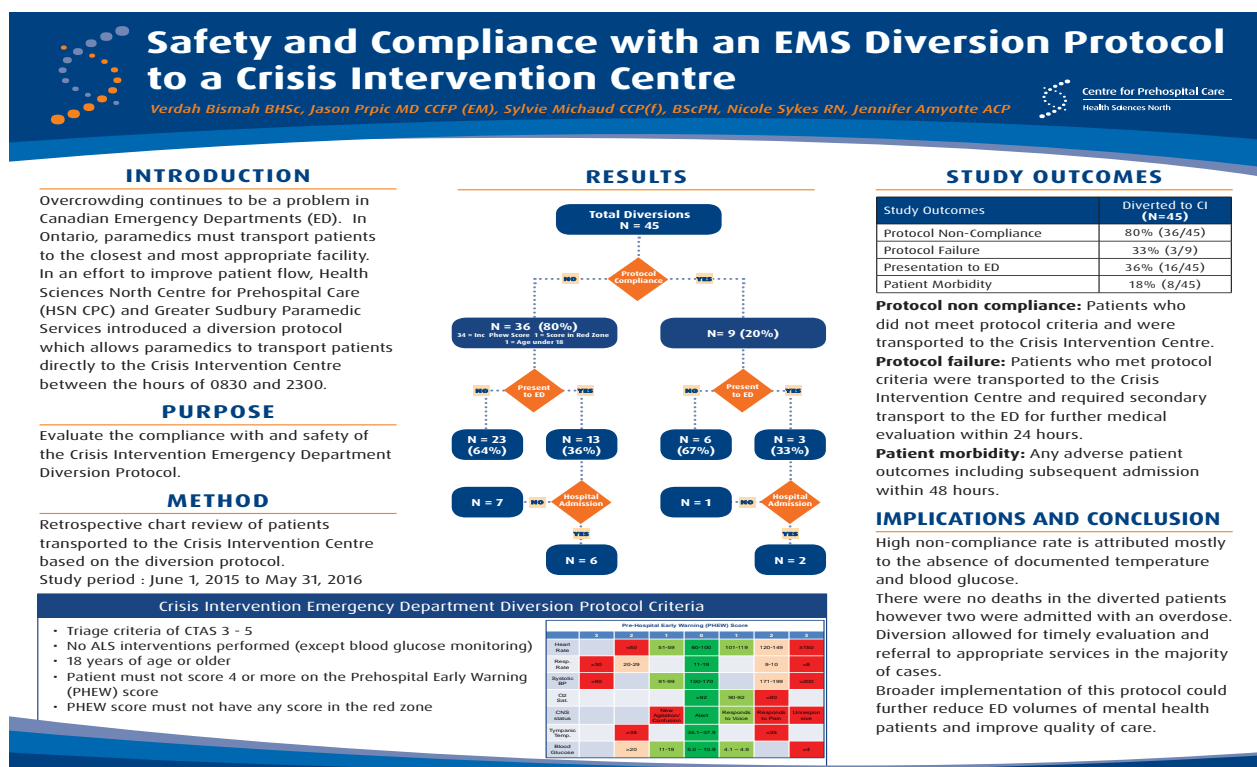

| Prehospital Early Warning (PHEW) Score |     |        |         |         |      |      |
|--|-----|--------|---------|---------|------|------|
|  | 0   | 1      | 2       | 3       | 4    | 5    |
| Heart Rate (BPM)                       | <60 | 61-90  | 91-120  | 121-149 | ≥150 | ≥160 |
| Breathes                               | Y/N | Y/N    | Y/N     | Y/N     | Y/N  | Y/N  |
| Response                               | Y/N | Y/N    | Y/N     | Y/N     | Y/N  | Y/N  |
| Systolic BP                            | <90 | 91-109 | 110-139 | 140-179 | ≥180 | ≥200 |
| CAD Risk                               | Y/N | Y/N    | Y/N     | Y/N     | Y/N  | Y/N  |
| CTAS Rating                            | 1-2 | 3      | 4       | 5       | 6    | 7    |
| Emergency Wagon                        | Y/N | Y/N    | Y/N     | Y/N     | Y/N  | Y/N  |
| Blood Glucose                          | <60 | 61-119 | 120-179 | 180-279 | ≥280 | ≥300 |

## Safety and Compliance with an EMS Direct Transport Protocol to a Mental Health Facility vs. Emergency Department

Verdah Bismah, Queen's University, Jason Prpic, Sylvie Michaud, Nicole Sykes, Paul Myre, Health Sciences North Centre for Prehospital Care,

**Background:** Transportation to alternative destinations (diversion) has been proposed as part of a resolution to overcrowding in hospital emergency departments (ED). We aimed to evaluate compliance and safety of an EMS protocol allowing paramedics to transport medically stable mental health patients to an alternate facility, Crisis Intervention (CI). Patients were eligible for diversion if they were  $\geq 18$  years old, scored  $<4$  on the modified Prehospital Early Warning (PHEW) score, and did not have any vital sign parameters in the red zone (as per PHEW score criteria). We hypothesize this protocol is safe for the prehospital diversion of mental health patients. **Methods:** A retrospective analysis was conducted on patients presenting to EMS with psychiatric complaints. Study outcomes were: missed protocol opportunities, protocol noncompliance, protocol failure (presentation to ED within 48 hours of appropriate diversion), and patient morbidity (hospital admission or adverse event within 48 hours of diversion). Data was abstracted from EMS reports, hospital records, and CI discharge forms. Data was analyzed using proportions and 95% confidence intervals. **Results:** EMS responded to 695 calls with psychiatric complaints, 650 were taken to the ED and 45 were diverted. Of the 650 patients taken to ED, 18 (3%) could have been diverted to CI, these are missed protocol opportunities. Of the 45 diversions, there was protocol noncompliance in 36 cases (80%), but 34 were due to incomplete sets of vital signs. Only 1 (3%) diversion involved vital signs documented outside allowed limits. 13 patients (36%) from the protocol noncompliance group presented to ED within 48 hours of diversion, 6 were admitted. Protocol failure occurred in 3 patients (33%) who met diversion criteria but presented to ED within 48 hours, 2 of which were admitted. Overall, 16 patients (36%) presented to the ED after diversion, and 8 (18%) were admitted. **Conclusions:** EMS providers had high levels of compliance with the protocol when taking patients straight to the ED. There was poor protocol compliance in diverting patients to an alternate destination, though this is largely attributed to incomplete recording of vital signs. The protocol provides moderate levels of safety in diverted patients.

## qSOFA Sepsis Alert Protocol

Severe sepsis and septic shock has a mortality rate of approximately 30%. Delays in antibiotic administration leads to increased mortality. Early antibiotics and fluid administration have an impact on patient outcome. We hypothesized that the implementation of an EMS sepsis-alert in the pre-hospital setting will not lead to reduction in antibiotic administration time in the Emergency Department.

This was a single center pre and post retrospective observational study measuring the effect of a sepsis alert implementation in the prehospital setting on antibiotic administration times in the ED. The pre-implementation period spanned from June 5, 2015 to June 5, 2016. We used the International Classification of Diseases (ICD)-10 codes for sepsis to retrieve all charts with a sepsis diagnosis made in the Emergency Department. The Sepsis Alert was implemented on June 6, 2016 and the post-implementation data was gathered until February 28, 2017. The diagnosis of sepsis in the ED for the intervention period was based on the Third International Consensus Definitions for Sepsis and Septic Shock definition and charts were individually reviewed by a physician.

The mean time to antibiotics in the pre-group was 138.81 minutes whereas the post-group had a mean time of 90.20 minutes. We performed a two-sample t-test with unequal variance which showed that the difference was statistically significant with a  $p=0.003$ . This was an absolute mean reduction of 48.81 minutes.

We were able to reject the null hypothesis and were able to show a clinically and statistically significant reduction in the time to antibiotic administration with the implementation of the qSOFA Sepsis Alert protocol. Our sample size was much smaller than required in order to power the study at 80% and our study was only powered at 26%. However, given that we were able to reject the null hypothesis, although underpowered, the results remain valid.

## Prehospital Medical Direct- Stroke Care Outcomes

Stroke is a leading cause of adult disability in Canada. More than 25,000 Ontarians experience a stroke every year and over 100,000 are living with the consequences of stroke. As a result, the Ontario Stroke System was developed to establish an integrated and coordinated system designed to improve patient care and outcomes for persons who experience a stroke in the province. Our primary objective was to create connections between pre-hospital records (Ambulance Call Reports) and hospital data at the 4 Designated Stroke Centre (DSC) and Tele-Stroke Centre to gain a better understanding of the stroke and TIA volumes within the North East LHIN. Methods: This was a prospective cohort study involving all prehospital patients presenting with possible signs or symptoms of stroke. The HSN CPC database was queried for any Ambulance Call Reports with a documented Primary and/or Final Problem Code of (41) Stroke/TIA between April 01, 2015 and March 31, 2016. 866 ACRs were retrieved. Of those, 51 ACRs were merged with the primary ACR, 39 were emergency inter-hospital transfers, and 4 ACRs had refusals from the patient. 772 patients were included for secondary review. Results: Of the 772 patients triaged under the Stroke Protocol, 5% (n=41) were redirected to a DSC, 13% (n=98) were transported to a community hospital and 82% (n=633) were transported to a DSC not on redirect (the closest hospital was also a DSC). Overall, 87% (n=674) of patients presenting with signs or symptoms of stroke in northeastern Ontario are transported to a DSC. Of the 41 redirected, 29% (n=12) were transported to Health Sciences North, 24% (n=10) to Timmins and District Hospital, 17% (n=7) to Sault Area Hospital, 15% (n=6) to North Bay Regional Health Centre, 15% (n=6) Temiskaming Hospital (tele-stroke). Of the 98 patients who were not redirected to a designated stroke centre, all but one patient had sufficient documentation to support the decision of transporting the patient to a community hospital versus a DSC.

# MEDICAL DELEGATION

**Q1** The Host Hospital shall ensure that Emergency Medical Attendants and Paramedics are qualified to perform the Controlled Acts and/or other medical procedures as recommended by the Provincial Medical Advisory Committee (PMAC) and the Director. Describe the process.

The HSN CPC is mandated by the Ambulance Act (Ontario Reg. 257/00) to ensure that paramedics are competent to practice. The method by which paramedics are certified is strongly influenced by the Delegation of Controlled Acts policy developed by the College of Physicians and Surgeons of Ontario. In short, it is the responsibility of the Regional Base Hospital Programs to provide an ongoing process by which the “Providers” are continuously informed of best practice guidelines and new trends and are competent to practice in the prehospital environment. As no single process can accomplish these goals, the HSN CPC combined various methodologies and techniques to be utilized as part of a comprehensive continuing education program. The goal of the CME program is to prepare paramedics to respond appropriately to a wide range of patient situations both routinely and infrequently encountered in the field. Paramedics who do not meet these requirements may be subject to a performance review by the Medical Director or delegate and may have their certification temporarily suspended until such a time that all mandatory CME credit hours are accumulated.

Paramedic Services present paramedics who have, at minimum, an offer of employment at the requested paramedic level to the Base Hospital for certification. Primary Care Paramedics (PCP) complete an orientation process to ensure that they are properly prepared for the evaluation process. They demonstrate competency through a process of scenarios and written questions mapped to their respective scope of practice. During the certification event, they are required to demonstrate competency through a series of scenarios, skills stations and oral questions. In addition to the requirements of a PCP, all Advanced Care Paramedic (ACP) candidates are required to have written the MOH ACP exam prior to attending.

**Q2** The Host Hospital shall ensure that the Base Hospital Program establishes and maintains a procedure whereby Paramedics already certified under the authority of another Base Hospital Program Medical Director are recognized by the Base Hospital Program.

**2.1** Describe the procedure used to ensure paramedics already certified under the authority of another Base Hospital Program Medical Director are recognized by the Base Hospital Program.

Cross Certification applies to paramedics already certified by an Ontario Base Hospital who are seeking certification from another Base Hospital. Once the paramedic is deemed eligible for cross-certification, the Paramedic must complete the Certification Request Form which includes:

- Certification from previous Ontario Base Hospitals.
- A declaration of any deactivation and/or decertification.
- Current certification status from previous Base Hospitals under which the paramedic is certified.
- Permission for the prospective Base Hospital to obtain information from other Base Hospitals regarding paramedic competencies and skills.

Following this, the Paramedic must successfully complete a Base Hospital orientation and/or evaluation process for any or all Auxiliary Medical Directives required which may include an interview/clinical evaluation with the medical director or delegate. It may also include an evaluation using written, scenario based, and oral examinations. But this is reserved only for skills the paramedic was not certified in with their previous Base Hospital.

After completion of these steps, the Base Hospital Medical Director will certify the paramedic.

**2.2** Total number of paramedics that work for more than one employer.

As of March 31, 2017, HSN Centre for Prehospital Care had 69 paramedics who worked for more than one employer.

## Q3 Provide a list of affiliated Ambulance Services with whom the Base Hospital has signed agreements.

### 3.4 A list of the Controlled Acts that have been removed this reporting year.

There have been no Controlled Acts removed from April 1, 2016- March 31, 2017.

### Q4 Does the Host Hospital adhere to the Provincial Medical Directives recommended by the PMAC and approved by the Director?

HSN Centre for Prehospital Care adheres to the latest version of the ALS PCS Version 3.3 as well as the latest Version 3.4 which came into effect on February 1, 2017.

### Q5 The Host Hospital shall adhere to Provincial Certification, Recertification, Change in Certification and Remediation policies, as recommended by PMAC within recommended timelines.

### 5.1 Have the provincial Certification, Recertification, Change in Certification and Remediation policies, as recommended by PMAC within recommended timelines been adhered to?

HSN CPC adheres to the Provincial Maintenance of Certification Policy, Appendix 6 in the Advanced Life Support Patient Care Standards, Version 3.3, as well as the latest Version 3.4 which came into effect on February 1, 2017.

### 5.2 Total number of initial PCP and ACP certification awarded in the reporting year.

| PERIOD                         | TOTAL ACPs | TOTAL PCPS | TOTAL |
|--------------------------------|------------|------------|-------|
| April 1, 2016 to March 31 2017 | 7          | 54         | 61    |

## Q6.1 Does the Medical Director practice emergency medicine full-time or part-time in the hospital emergency unit?

The medical director currently works in the HSN Emergency Department and exceeds the minimum requirement of 250 clinical hours.

## 6.2 Does the Medical Director hold recognized medical specialty credential(s) in emergency medicine?

The Medical Director is credentialed in Emergency Medicine as CCFP (EM).

## Q7.1 Do all Base Hospital physicians have knowledge of paramedic practice and provincial medical directives?

HSN CPC has centralized all BHP patching to the Health Sciences North Emergency Department. Base Hospital Physicians are all Emergency Department Physicians and final year Residents credentialed through Health Sciences North.

The Emergency Department Physicians receive an orientation program which includes an overview of their roles and responsibilities as base hospital physicians and an introduction to the ALS Patient Care Standards. Dr. Prpic, Medical Director, regularly reviews the directives and/or amendments with the emergency physicians and shares CQI findings. The latest revision to the orientation manual relevant to the 2016-2017 fiscal year was in August 2015.

Emergency Department meetings have a standing Prehospital Care Section where changes in practice/directives can be addressed.

## 7.2 Total number of emergency physicians engaged as a Base Hospital Physician (list names).

28 emergency physicians were engaged as Base Hospital Physicians

| BASE HOSPITAL PHYSICIANS |                           |                       |
|--------------------------|---------------------------|-----------------------|
| Dr. Alex Anawati         | Dr. Robert Lepage         | Dr. Andy Primeau      |
| Dr. Dominique Ansell     | Dr. Louise Logan          | Dr. Jason Prpic       |

| Dr. Adam Lenny           | Dr. Robert Pineau         |                       |

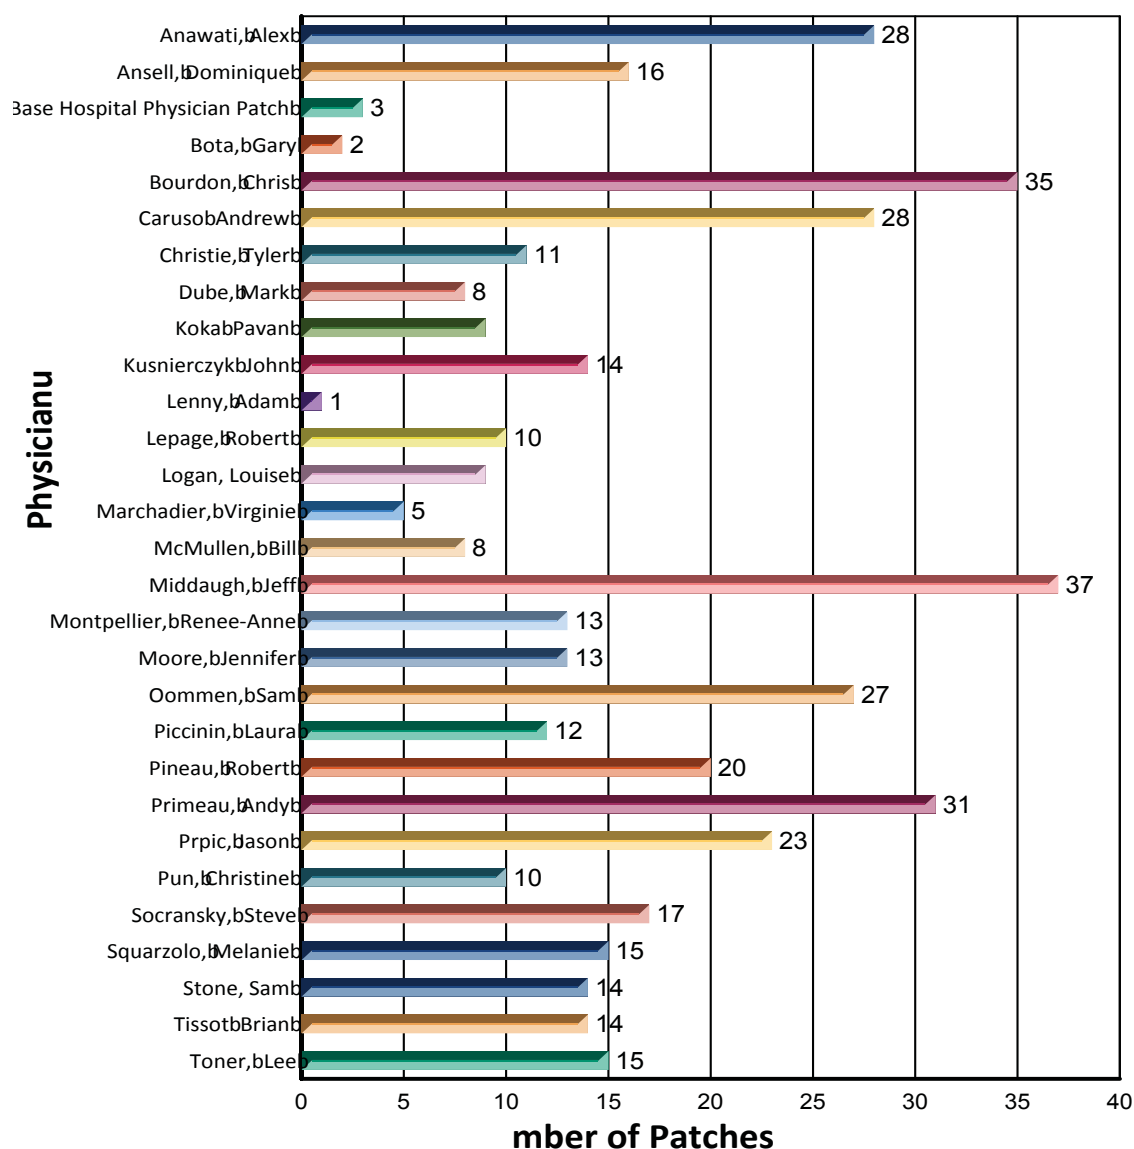

## Q8.1 Total number of Base Hospital physician and paramedic online interactions that have been reviewed for medical quality.

Total of 448 online interactions occurred between April 1, 2016 and March 31 2017, and 100% were reviewed for medical quality.

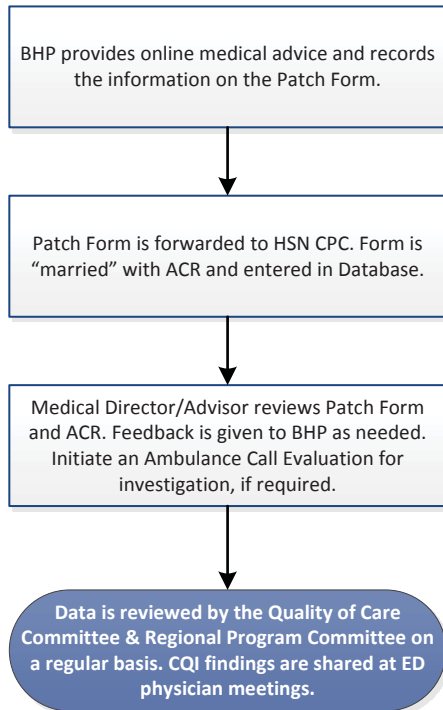

### Total Patches by Base Hospital Physician

N = 448b

Call Date: April 1, 2016 to March 31, 2017b

## 8.2 Describe the medical quality review process.

# MEDICAL OVERSIGHT

**Q9** List the dates of Provincial Medical Advisory Committee (PMAC) meetings attended by a member of the Base Hospital Program.

- May 16, 2016
- September 27, 2016
- December 6, 2016
- March 1, 2017

**Q10** Are Base Hospital Physicians available for on-line medical direction and control on a 24 hr/7 days a week basis?

Yes.

**Q11** The Host Hospital shall ensure that the Base Hospital Program enters into and keeps in effect an agreement with each certified land ambulance service provider listed in Appendix D, with respect to the qualification, ongoing medical oversight, and re-qualification of Paramedics to deliver controlled medical acts under the authority of the Base Hospital Program Medical Director.

HSN CPC has an agreement with each land ambulance service in the Northeast.

**Q12** The Host Hospital shall ensure that the Base Hospital Program monitors the delivery of patient care in accordance with the Advanced Life Support Patient Care Standards. Describe the actions taken to monitor the delivery of patient care in accordance with the Advanced Life Support Patient Care Standards.

Continuous Quality Improvement (CQI) is a complex responsibility that requires the collective effort of varied focus areas. Within the HSN CPC, CQI is attained through an integrated system of performance measurement, performance improvement and continuing medical education within a broad based system of quality management and medical leadership.

Performance Measurement is accomplished by collecting and randomly reviewing ambulance call reports (ACRs) for the appropriateness and quality of advanced patient care. Skills and specific patient conditions are categorized as high or low risk procedures by HSN CPC Quality of Care Committee (QCC). Tables 1 & 2 from Appendix N of the HSN CPC Performance Agreement (PA) are then applied to determine the total number of calls to be reviewed through the Ambulance Call Evaluation (ACE) process.

Quality Improvement is an inclusive, multidisciplinary process that focuses on identification of system wide opportunities for improvement. Our efforts focus on identification of the root causes of problems through Event Analyses, Self-Reports, and Clinical Audit Reports to reduce or eliminate these causes and develop steps to correct inadequate or faulty processes. The need and importance of a wide overlap between performance measurement, performance improvement and Continuing Medical Education (Figure 4) is vital to ensure ongoing quality patient care as demonstrated in the well-known and widely used Plan-Do-Study-Act cycle (Figure 5).

FIGURE 4

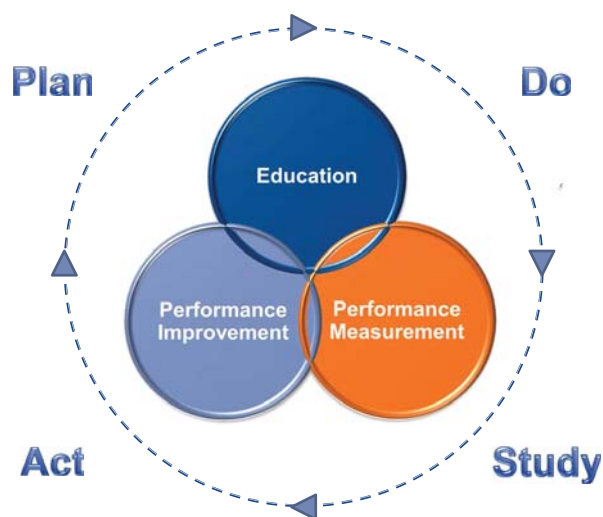

FIGURE 5

**Q13** The Host Hospital shall ensure that the Base Hospital Program monitors the delivery of patient care in accordance with the Basic Life Support Patient Care Standards, if such monitoring is contained in the agreement with the Upper Tier Municipality and Designated Delivery Agent for land Ambulance Services as set out in Appendix D.

HSN Centre for Prehospital Care has an agreement with Manitoulin-Sudbury DSB that requires monitoring of the delivery of patient care in accordance with the Basic Life Support Patient Care. A novel model for sampling calls of significant interest was collaboratively developed to perform this work. All other audit activities centre around the ALS PCS. Where a BLS issue is noted during the regular ALS auditing processes, service operators are notified for their follow up.

**Q14/14.1** The Host Hospital shall ensure that timely advice is provided to each Upper Tier Municipality and Designated Delivery Agent for Land Ambulance Services as set out in Appendix D regarding medical issues in prehospital care. Provide the total number of prehospital medical care issues raised by the UTM or DDA that required advice from the Base Hospital. Total number of prehospital medical care issues raised by the UTM or DDA that required advice from the Base Hospital.

Inquiries received by the UTM or DDA involving medical issues in prehospital care are logged in the Ambulance Call Evaluation Data Base.

41 requests were received, of which 9 resulted in an event analysis and were copied to the Field Office.

| OUTCOME  |    |
|--|----|
| None   | 4  |
| Resolved through Clinical Interview                    | 3  |
| Resolved Through Discussion                            | 14 |
| Resolved Through Remedial Action                       | 2  |
| Resolved with Directional and/ or Education Statements | 18 |

**14.2** List the top 5 subject areas that advice was requested from UTM and DDAs (i.e. medical equipment, medical acts, policies, etc).

1. Medical Directives and Auxiliary Skills
2. ePCR audits
3. BLS advice
4. Patient Care Equipment
5. Policy and Procedures

**Q15** The Host Hospital shall ensure participation in provincial, regional and community planning that affects prehospital care such as emergency planning, where the Host Hospital has the authority to do so. The total number and dates of provincial, regional, and community planning meetings, indicate the meeting hosts are listed below.

| REGIONAL | PROVINCIAL | COMMUNITY | NATIONAL |
|----------|------------|-----------|----------|
| 39       | 62         | 45        | 1        |

**Q16** The Host Hospital shall make every reasonable effort to ensure that each request for medical advice, direction, or assistance received from an Emergency Medical Attendant, paramedic or communications officer is provided expeditiously and that performance standards are set out in this Agreement are met.

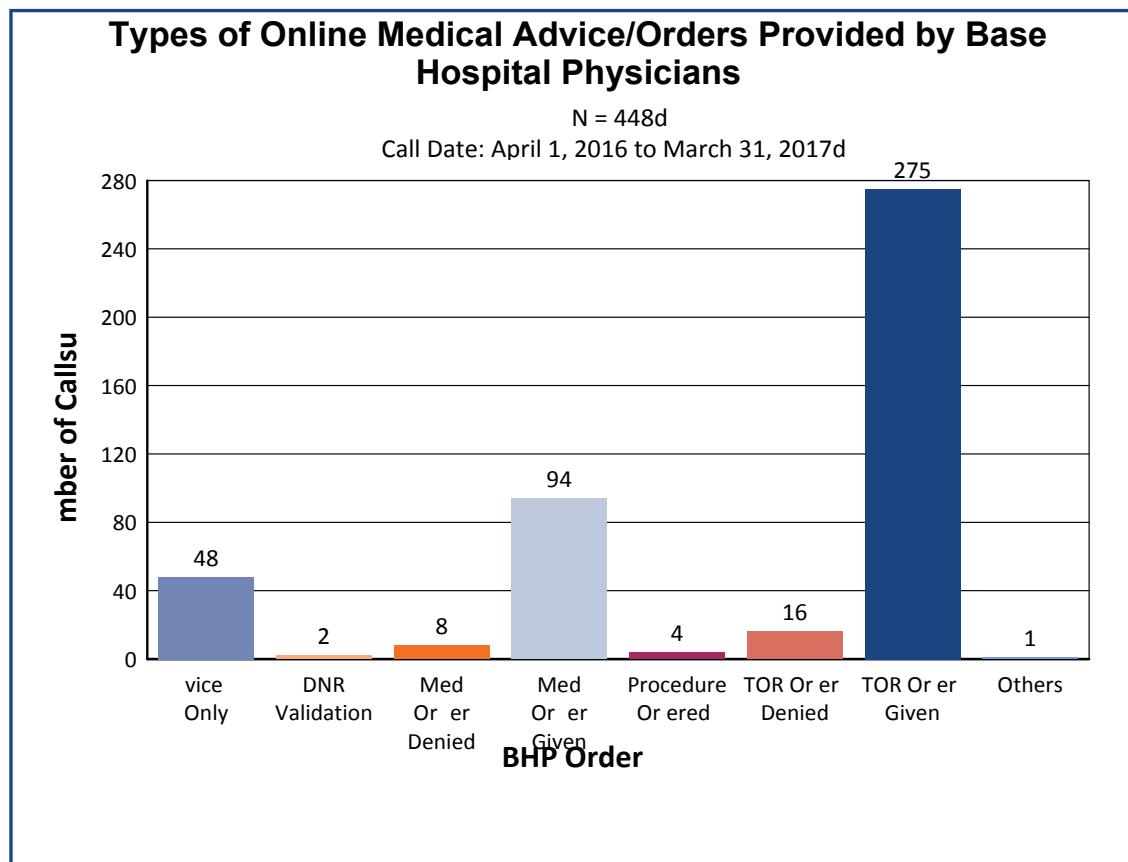

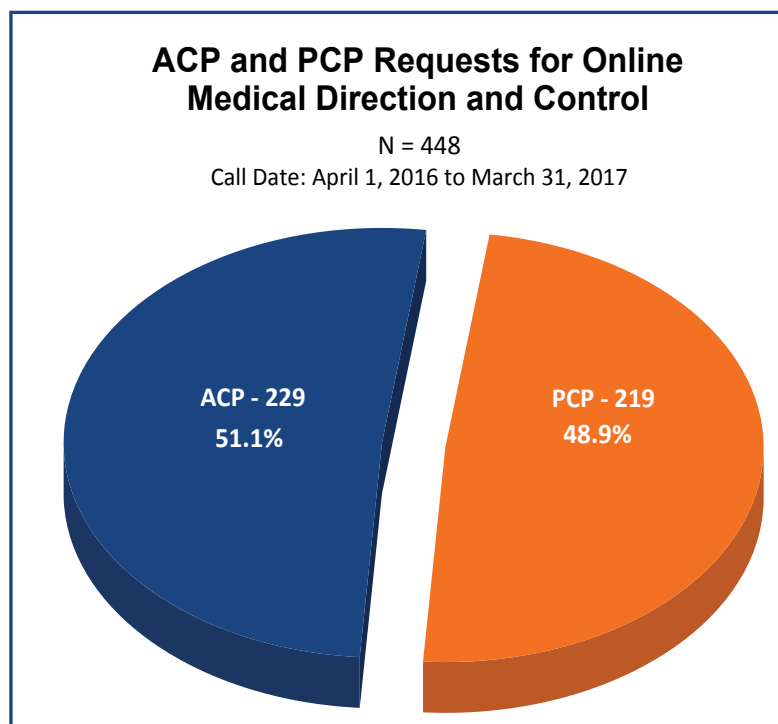

**16.1** How are requests for medical advice, direction or assistance from an emergency medical attendant, paramedic or communications office provided?

The following are primary methods of communication:

- 24/7 Online Medical Direction and Control through the Base Hospital Physicians
- iMedic/ Zoll which is used to discuss audit findings and patient care dialogues
- Email which is used for the communication of general information and notifications
- Live chats during webcasts are a means for paramedics to ask questions and interact with their medical directors
- Twice annual (at minimum) in person sessions with Paramedic Practice Coordinators in an interactive education setting

## 16.2

Total number of formal requests for medical advice direction or assistance from an Emergency Medical Attendant, Paramedic or communications officer provided.

**Q17** Where a Host Hospital has not been available to expeditiously provide medical advice (eg. Radio patch), direction, or assistance to an Emergency Medical Attendant, Paramedic, or communications officer, the Host Hospital shall document the circumstances of the event in an incident report that will be provided to the Senior Field Manager within 48 hours of the event.

The total number and nature of incident reports provided to the senior Field Manager related to medical advice delays.

All patch failures identified during the ACE process or escalated to the QI Lead are further analyzed to determine root cause and to recommend system improvements.

There were 5 incidences reviewed and of those only 2 resulted in no BHP contact. All were reported to the Field Office.

**Q18.1** Describe the process used to assist operators with request for assistance and information regarding direct patient care components and elements of local policy and procedures.

Once a request for assistance and/or information has been received in writing by the program, it is triaged by the receiver to determine if its nature is Medical, Educational, CQI, Research, Operational or Other.

- Medical advice and/or inquiries are reviewed by the applicable Medical Advisor or the Regional Medical Director and, when required, forwarded to the Quality of Care Committee (QCC) to be reviewed by the Medical Program as a whole. Minutes of this committee are available to all staff and a report from this committee is provided at Regional Program Committee meetings.
- Educational advice and/or inquiries are assigned to the Regional Education & Certification Coordinator for review and, when required, brought to monthly Council or QCC meetings. A Medical Advisor or the Regional Medical Director may be consulted, as needed.
- Quality Improvement advice and/or inquiries are forwarded to the Quality Improvement Lead for review. A Medical Advisor or the Regional Medical Director may be consulted, as needed.
- Assistance or information related to reportable program metrics are forwarded to the Performance Measurement Lead for review.
- Operational advice and/or inquiries are forwarded to the applicable Paramedic Practice Coordinator and, when required, forwarded to the monthly Council meetings for review.
- Research inquiries are forwarded to the Performance Improvement Lead or Regional Manager and when required, the Regional Medical Director is consulted.

## 18.2

List the top 5 subject areas that information was requested from operators (i.e. medical equipment, medical acts, policies, etc).

1. Initial certification / Return to work requests
2. ePCR Audit requests / ACE reviews
3. Investigation and Remediation
4. Medical equipment purchase advice
5. Continuing Medical Education

# EDUCATION

**Q19** The Host Hospital will provide a process to confirm and/or ensure the education and standard of practical skills necessary for certification and delegation of specific controlled acts approved by the Provincial Medical Advisory Committee (PMAC) to Emergency Medical Attendants and Paramedics.

HSN Centre for Prehospital Care develops a yearly CME program that covers the paramedic scope of practice as per the ALS PCS. The goal of the CME program is to prepare paramedics to respond appropriately to a wide range of patient situations both routinely and infrequently encountered in the field.

The MOHLTC-EHSB has mandated that PCPs receive a minimum of 8 hours of CME and that ACPs receive a minimum of 24 hours of CME annually. To meet the needs of the service operators, the paramedics and the Regional Base Hospital Programs, these hours have been converted to credit hours. In order for Northeast Paramedics to remain in good standing and maintain certification, ACPs must accumulate 24 credit hours while PCPs must accumulate 8 credit hours by the first week in December of each calendar year. Paramedics who do not meet these requirements are subject to a performance review by the Medical Director or delegate and may have their certification temporarily suspended until such a time that all mandatory CME credit hours are accumulated.

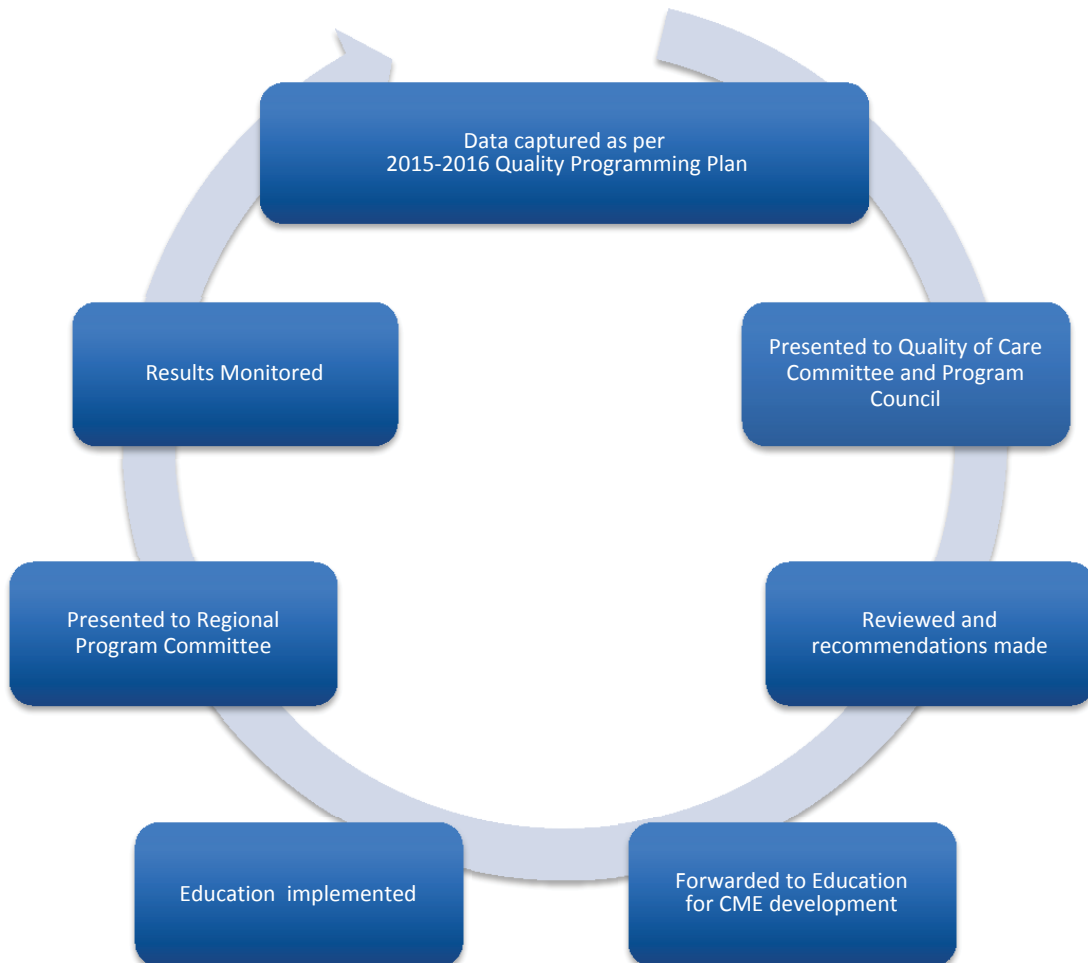

**19.1** List the topic, date and length of each continuing medical education program offered to and held for medical, nursing and other allied health staff of the Host Hospital and receiving hospitals in the Ministry-approved geographic coverage area.

| DATE              | TOPIC/INSTRUCTOR   | HOURS |
|-------------------|--|-------|
| June 21, 2016     | Manual Defibrillator: Shocking news / Dr. Chris Loreto       | 2     |
| June 30, 2016     | Sepsis- New Information/ Dr. Derek Garniss                   | 2     |
| July 6, 2016      | CPR/ Monique Lapointe  | 3     |
| September 6, 2016 | CPR/ Eric Levasseur  | 3     |
| September 8, 2016 | Prehospital Pediatrics/ Dr. Sean Murray                      | 2     |
| December 1, 2016  | Effective Self-Directed CME for Paramedics /Dr. John Tuinema | 2     |
| December 6, 2016  | Termination of Resuscitation / Dr. Derek Garniss             | 2     |
| December 6, 2016  | CPR/ Monique Lapointe  | 3     |
| February 2, 2017  | Opiate Crisis Part 1 and 2 / Dr. Chris Loreto                | 2     |
| March 7, 2017     | CPR/ Eric Levasseur  | 3     |

**Q20** The Host Hospital shall ensure that prehospital patient care education is provided in accordance with education standards approved by the Minister as may be implemented and amended from time to time. Provide the topics and time allotted for each educational session delivered this year to paramedics.

| DATE                     | TOPIC/INSTRUCTOR  | HOURS |
|--------------------------|---|-------|
| April- June 2016         | Spring Paramedic Practice Rounds: 12 Lead ECG interpretation and Death Review (Entire Region) | 4     |
| June 21, 2016            | Manual Defibrillator: Shocking news / Dr. Chris Loreto  | 2     |
| June 30, 2016            | Sepsis- New Information/ Dr. Derek Garniss  | 2     |
| June- September 2016     | Summer CME Series M & M Rounes with Dr. Jason Prpic (ACP only)                                | 6     |
| September 8, 2016        | Prehospital Pediatrics/ Dr. Sean Murray   | 2     |
| September- November 2016 | Fall Paramedic Rounds (Elective)  | 4     |
| December 2016            | Adding Critical Thinking to Cath Lab Activations, Part I                                      | 2     |
| December 2016            | Adding Critical Thinking to Cath Lab Activations, Part II                                     | 2     |
| December 1, 2016         | Effective Self-Directed CME for Paramedics /Dr. John Tuinema                                  | 2     |
| December 6, 2016         | Termination of Resuscitation / Dr. Derek Garniss  | 2     |
| February 2, 2017         | Opiate Crisis Part 1 and 2 / Dr. Chris Loreto   | 2     |

**Q21** The Host Hospital shall ensure the development and implementation of an educational plan for the Region linked to Continuous Quality Improvement initiatives.

**Q22** The Host Hospital shall ensure the provision of the mandated hours of education per year for both PCPs and ACPs.

**22.1** Total number of hours of CME delivered per PCP.  
In this fiscal year, 8 hours minimum were delivered per PCP.

**22.1** Total number of hours of CME delivered per ACP.  
In this fiscal year, 24 hours minimum were delivered per ACP.

# CONTINUOUS QUALITY IMPROVEMENT (CQI)

**Q23** The Host Hospital shall ensure the implementation of a CQI program for each Paramedic employed or engaged by land ambulance service operators as set out in Appendix D, and ensure the provision of regular commentary to each Paramedic and operator.

**23.1** Total number of paramedics that have been provided with commentary by the host hospital and a brief description of their program.

All paramedics certified under the Program receive commentary on a regular basis, generally via the applicable Paramedic Practice Coordinator for their area. Commentary may include electronic distribution of memos, policies and other documents. As part of auditing activities, paramedics are provided commentary on at least 5 of their ACRs involving ALS skills, if available. Additionally, paramedics receive positive commentary via the program's electronic Ambulance Call Evaluation system whenever possible.

**23.2** Total number of commentary provided to all paramedics.

During the fiscal year 2016/2017, HSN CPC made available approximately 6053 commentaries to paramedics via the Ambulance Call Evaluation process. This means that commentary was made available to paramedics for 100% of all calls audited.

The program also distributed various correspondence including 7 memos/ letters to paramedics via email and the HSN CPC website. In addition, 13 MOH EHSB memos with attachments such as training bulletins and standard documentation were distributed and posted to the website.

## 23.3 Was a minimum of one chart review commentary provided to each paramedic?

100% of chart review commentaries are available to paramedics 24/7 via an electronic system.

Our electronic system allows paramedics access to 100% of all auditing activities related to themselves. Generally, 5 audits are conducted per paramedic resulting in 5 commentaries available in the system.

## Q25 The Host Hospital shall include a report on all CQI activities and findings as part of the annual report submitted to the Ministry.

Refer to [Appendix A: Performance Measurement Standard Reports, Section 2](#) for the overall Audit Activities Summary Report and [Section 3](#) for Patient Care Variance Report.

## Q26 The Host Hospital shall collaborate with Emergency Medical Services System Stakeholders to share relevant CQI data, as appropriate. How and when was CQI data shared with Emergency Medical Services System stakeholders?

| WHAT  | WHO  | FREQUENCY   | HOW                    |
|---|--|---|------------------------|
| <b>AMBULANCE CALL EVALUATION (ACE)</b><br>Notification of any event or circumstance which could have resulted, or did result, in unnecessary harm to a patient.<br>Any ACE that has been weighted, on closure, with an error severity of Major or Critical. | <ul style="list-style-type: none"> <li>Paramedics</li> <li>Service Providers</li> </ul>  | <ul style="list-style-type: none"> <li>Upon discovery</li> <li>During review</li> <li>Upon closure</li> </ul> | ACE platform           |

**Q27** The Host Hospital shall ensure that Host Hospital physicians will be available to provide “online” continuous quality improvement and advice on a continuous basis.

All HSN Emergency Physicians and 3rd year Residents are oriented by the Base Hospital Regional Medical Director prior to providing on-line Medical Control. Ongoing education is delivered during face-to-face departmental meetings and via email updates.

Dedicated patch phones are located in the HSN Emergency Department (ED). All Registered Nurses in the ED have been trained, through the ED Nurse Clinician, to answer the patch telephone and advise paramedics that a BHP will be on the line shortly. The RN answering the telephone is responsible for notifying the BHP of the call and advising the paramedic if there will be any delay. HSN CPC has also provided formal education to the paramedics on patching. Reminder emails are sent on a regular basis to help keep this process consistent.

**Q28** The Host Hospital shall ensure the establishment of a mechanism to track customer inquiries and organizational responsiveness to these inquiries and survey land ambulance stakeholder groups on a regular basis, and that all consumer feedback will be reviewed and integrated into quality management planning.

All inquiries related to quality management are addressed in the same manner in which they were received i.e. an email is responded to with an email. Any inquiries/feedbacks relative to the quality management or education activities under the purview of the Base Hospital are incorporated into the Annual CME Plan and/or the Annual Quality Programming Overview. Each of these plans is provided to relevant stakeholders in draft form and feedback is actively solicited on each plan on an annual basis. All findings related to activities as laid out in the plan are distributed to key stakeholders and available upon request.

Additions to our Quality Programming Overview for 2017 will include the new chart audit processes and reporting based on our transition into IQEMS effective April 1, 2017. Changes to our Quality Programming are expected by the 3rd Quarter of 2017-2018 once we have determined all the various all the various reporting functionalities and new audit practices.

Refer to:

[Appendix A: Performance Measurement Standard Reports, Sections 3-7](#)

[Appendix B: Quality Programming Overview 2016](#)

[Appendix C: Quality Programming Overview 2017](#)

## Q29

The Host Hospital shall ensure the conduct of clinically-focused audits of controlled acts performed on or indicated for a patient by a Paramedic employed or retained by an operator covered by this Agreement, to monitor paramedic compliance with Provincial Medical Directives, in accordance with the following chart audit process:

### 29.1

Total number of Ambulance Call Reports (ACRs) requiring auditing.

The total number of medical directive/protocols and cases that required auditing following the sampling of high risk and low risk tables in accordance with our PA was 1121. In addition we were required to perform a minimum of 5 audits per medic. These numbers are not necessarily cumulative.

### 29.2

Total number of medical directive/protocols and cases that have been audited.

There were 6053 ambulance call reports that were electronically audited. Of these audited calls, 936 (15%) were identified as having a variance and required further action; and 5117(85%) were closed with no further action.

### 29.3

Have all paramedics that have performed at least 5 acts within the ALS PCS had a minimum of 5 ACR audited this year?

All Paramedics with at least 5 acts within the ALS PCS had a minimum of 5 ACRs audited this year.

Refer to [Appendix A: Performance Measurement Standard Reports, Section 2](#)

### 29.4

Total number of new paramedics (less than 6 months) and total number who had 80% of their charts audited

The Program audits a minimum of 80% of ALS Calls performed by newly certified Paramedics. This activity is ongoing and ever changing as new paramedics are brought into the numerous services throughout our area with many differing start dates.

There were 61 new ACP and PCPs in 2016-2017.

**29.5** Number of cancelled calls where paramedics made patient contact that were audited.

| PRIMARY PROBLEM                       | SKILL SETS REVIEWED | YEAR                     | # OF CALLS | ANNUAL AUDITS REQUIRED * | ~MONTHLY AUDITS REQUIRED | AUDITS COMPLETED TO DATE | ANNUAL VARIANCE |
|---------------------------------------|---------------------|--------------------------|------------|--------------------------|--------------------------|--------------------------|-----------------|
| <b>REFUSALS</b><br>72-Refused Service | Any treatment       | 2015/16 Total (Year End) | 7665       | 366                      | 31                       | 367                      | 1               |
|                                       | No treatment        | 2016/17 Total (Year End) | 7290       | 365                      | 30                       | 309                      | 56              |

\* Lower Risk Skills - Audit Requirements as per the Performance Agreement Table 1

### TABLE OF CONTENTS

- Section 1: HSN CPC Audit Requirements and Activities
- Section 2: HSN CPC Audit Requirements – Results
- Section 3: Patient Care Variances Report (ACE Outcomes)
- Section 4: Online Medical Control Interaction Reports
- Section 5: Service Operator Driven Audit Reports
- Section 6: Paramedic Self-Reports
- Section 7: BLS Issues Reported to Service Operators
- Section 8: Paramedic Skills Activities Report

## Performance Measurement Standard Reports April 1, 2016 – March 31, 2017

### SECTION 1

#### HSN CPC AUDIT REQUIREMENTS AND ACTIVITIES

This section provides the measurement of audit activities related to low and high risk calls based on the auditing activities April 1, 2015 – March 31, 2016 and compared with the previous fiscal from April 1, 2014 to March 31, 2015.

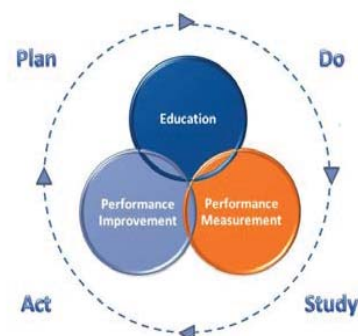

#### Medical Directives/Protocols and Cases:

- Higher level of auditing based on the call type.
- Use of a proven sampling model that addresses both low and high risk call types.
- Table 1 lists the required number of charts to be audited where medical directives/protocols or specific cases have been performed. This low risk model provides a sampling error of +/- 5% (CI 95%).
- Table 2 lists the required number of charts to be audited where there are higher risks associated with the performance of a skill or the completion of a certain type of call. This high risk model provides a sampling error of +/- 2.5% (CI 95%).

| Table 1 – Low Risk |        |
|--------------------|--------|
| Calls              | Audits |
| 50                 | 44     |
| 100                | 80     |
| 200                | 132    |
| 500                | 217    |
| 750                | 254    |
| 1000               | 278    |
| 2000               | 322    |
| 3500               | 346    |
| 5000               | 357    |
| 10000              | 370    |
| 20000              | 377    |
| 30000              | 379    |

| Table 2 – High Risk |        |
|---------------------|--------|
| Calls               | Audits |
| 50                  | 48     |
| 100                 | 94     |
| 200                 | 177    |
| 500                 | 377    |
| 750                 | 604    |
| 1000                | 806    |
| 2000                | 889    |
| 3500                | 1068   |
| 5000                | 1178   |
| 10000               | 1332   |
| 20000               | 1427   |
| 30000               | 1462   |

**Note:** Due to a change in our data collection process for Manitoulin-Sudbury their numbers for the 4th quarter are not reflected in this chart/report. Manitoulin-Sudbury performed 211 ALS calls in the 2015/16 Q4 period and 100% of these calls were audited therefore there is no significant impact on our requirements and statistics.

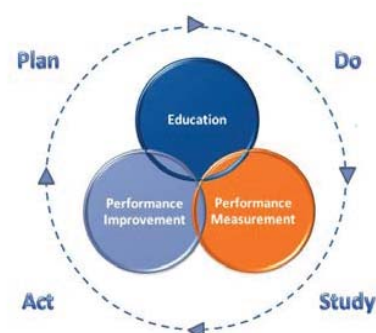

## Performance Measurement Standard Reports

### April 1, 2016 – March 31, 2017

\* = High Risk Skills - Audit Requirements as per the Performance Agreement Table 2

## Performance Measurement Standard Reports April 1, 2016 – March 31, 2017

### SECTION 2

#### HSN CPC AUDITING REQUIREMENTS - RESULTS

This section is a breakdown of auditing results by service operator and by paramedic and is based on the following paramedic auditing requirements as per the Regional Base Hospital Performance Agreement:

- Annually, each paramedic will have a minimum of 5 audited calls where a controlled act was performed.
- If a paramedic has less than 5 calls where a controlled act was performed, 100% of these calls will be audited.
- Newly certified paramedics will have 80% of calls where a controlled act was performed audited for the first six (6) months. Newly certified paramedics are those who have never been certified by a base hospital.

### Audit Activities Summary Report

## Performance Measurement Standard Reports April 1, 2016 – March 31, 2017

### SECTION 4

#### ONLINE MEDICAL CONTROL INTERACTION REPORTS

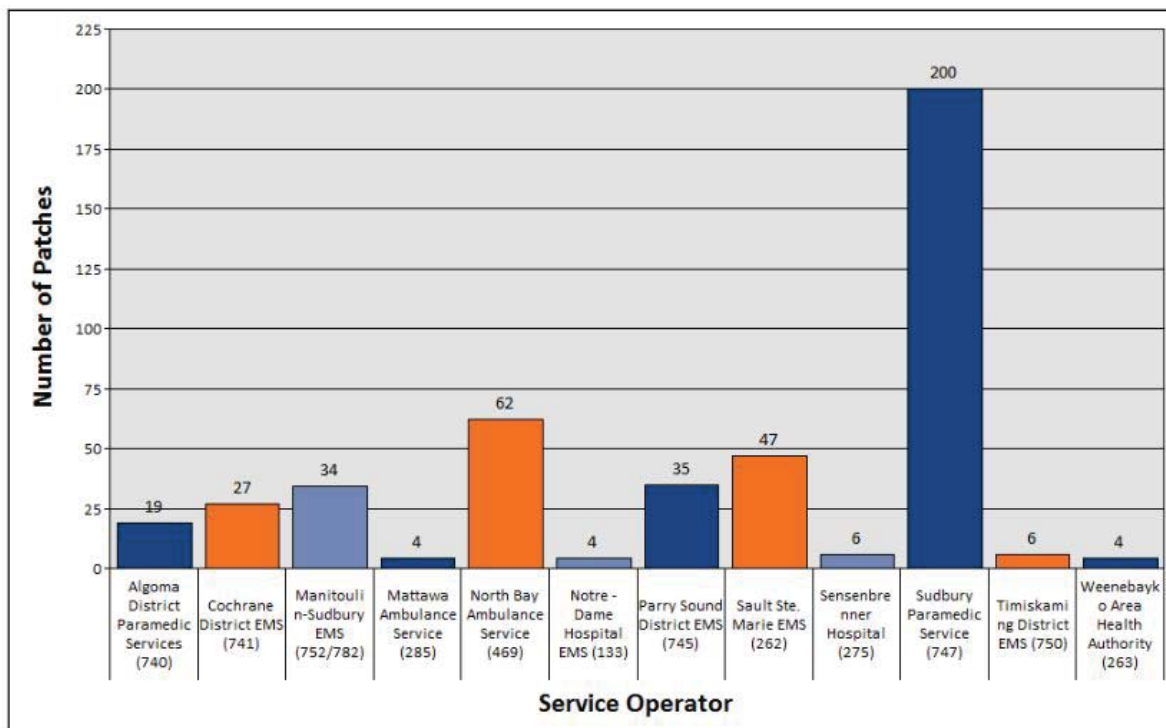

This section provides a summary of “Patch” interactions by service and by interaction type. As of September 24, 2014, 100% of all identified online medical control interactions are audited.

| TOTAL CPC AUDITING ACTIVITIES        |                    | 5922              |
|--------------------------------------|--------------------|-------------------|
|                                      | # of Audited Calls | % of Total Audits |
| On-Line Medical Control Interactions | 448                | 7.5%              |

#### Online Medical Control Interactions by Service Operator

Call Date: April 1, 2016 to March 31, 2017

N = 448

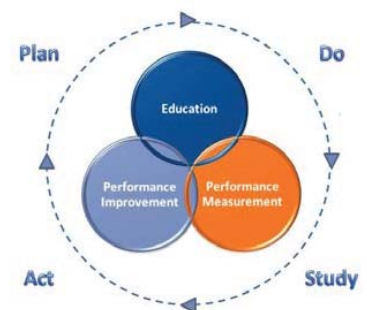

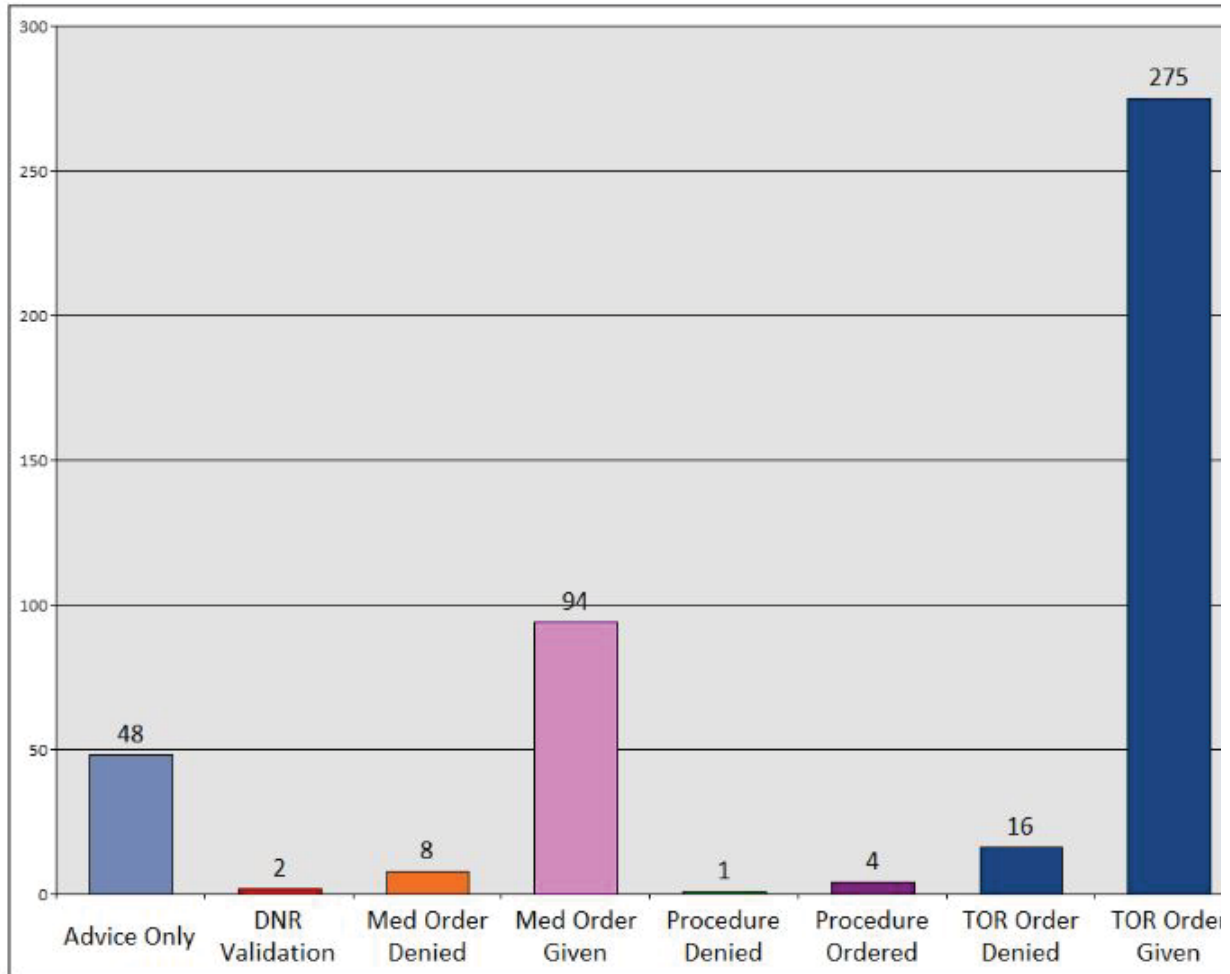

## Performance Measurement Standard Reports

### April 1, 2016 – March 31, 2017

### Online Medical Control Interactions by Type

Call Date: April 1, 2016 to March 31, 2017

N = 448

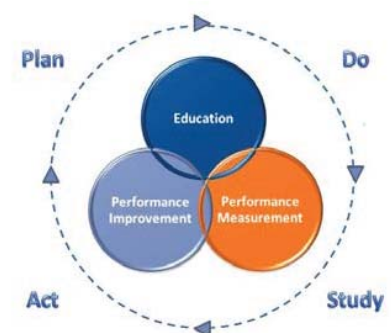

## Performance Measurement Standard Reports April 1, 2016 – March 31, 2017

### SECTION 5

#### SERVICE OPERATOR RELATED AUDIT REPORTS

This section provides a summary of all audits completed upon the request of the service operator.

| TOTAL CPC AUDITING ACTIVITIES          |                    | 5922              |
|--|--------------------|-------------------|
|  | # of Audited Calls | % of Total Audits |
| Service Operator Requests for Auditing | 40                 | 0.7%              |
| Service Operator Contracted Audits     | 181                | 3.05%             |

## Performance Measurement Standard Reports April 1, 2016 – March 31, 2017

### SECTION 6

#### PARAMEDIC SELF REPORTS

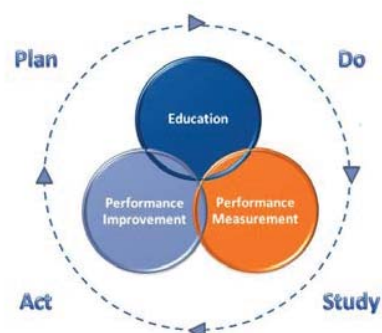

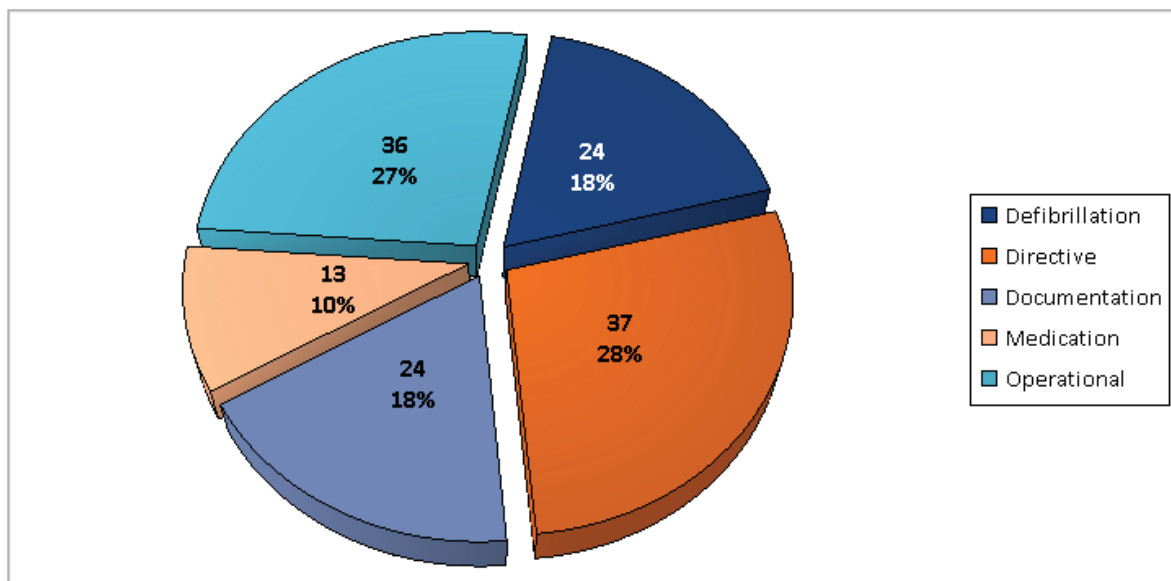

This section is based on paramedic self-reports received during this time period and are related to identified omissions and/or commissions in patient care or documentation.

Recognized as a very important component of paramedic practice, the number of self-reports continue to rise. Further expansion and development of this program continues as we strive to improve patient safety and outcomes.

#### HSN CPC Paramedic Self-Reports by Reason

Self-Reported April 1, 2016 to March 31, 2017

N = 134

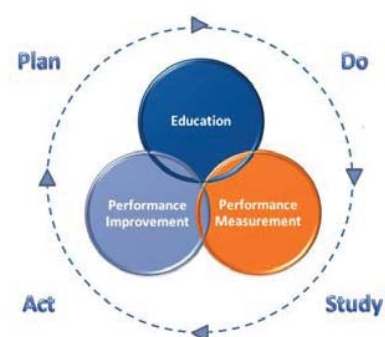

## Performance Measurement Standard Reports April 1, 2016 – March 31, 2017

### Paramedic Self-Reports by Service and Reason

Self-Reported April 1, 2016 to March 31, 2017

| Service            | Reason for Self-Report |           |               |            |             | Totals by Service |
|--------------------|------------------------|-----------|---------------|------------|-------------|-------------------|

## Performance Measurement Standard Reports April 1, 2016 – March 31, 2017

### SECTION 7

#### BLS ISSUES REPORTED TO SERVICE OPERATORS

This section is based on BLS PCS Issues identified during auditing of ALS calls and reported to the service operator.

| TOTAL CPC AUDITING ACTIVITIES                 |            |                   |
|---|------------|-------------------|
|   | # of Calls | % of Total Audits |
| BLS PCS Issues Forwarded to Service Operators | 113        | 1.9%              |

## Performance Measurement Standard Reports April 1, 2016 – March 31, 2017

### SECTION 8

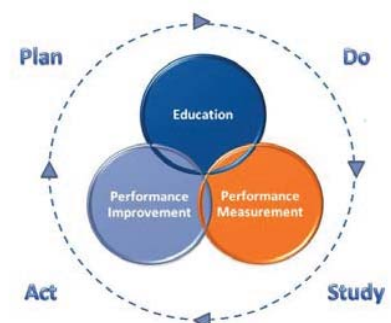

#### PARAMEDIC SKILLS ACTIVITIES REPORT

**Please note the following;**

**Service Count by ACR** – is the total number of calls (by call #) where a particular ALS skill set was used as part of the overall patient care plan.

**Paramedic by Name** - paramedic skills activities are based on the number of times a paramedic was on a call where an ALS skill was used as part of a patient care plan.

**Paramedic Count by Crew** – this count is based on the total count of ALS skill activities by the entire responding crew e.g. calls may have anywhere from 1-4 crew members identified on the ACR thereby each identified member would get credit for their active participation in the assessed need and delivery of the identified ALS skill set.

# ALS Skills Inventory

## April 1, 2016 - February 28, 2017

## QUALITY PROGRAMMING OVERVIEW 2016

Continuous quality improvement (CQI) is a complex responsibility that requires the collective effort of varied focus areas. Within the Health Sciences North Centre for Prehospital Care (HSN CPC), CQI is attained through an integrated system of performance measurement, performance improvement and continuing medical education within a broad based system of quality management and medical leadership.

Performance measurement is accomplished primarily by collecting and randomly reviewing ambulance call reports (ACRs) where Advanced Life Support (ALS) skill sets were performed and/or not performed when they should have been. Skills and specific patient conditions are categorized as either high or low risk procedures by the Health Sciences North Centre for Prehospital Care (HSN CPC) Quality of Care Committee (QCC). Tables 1 and 2 from Appendix N of the HSN CPC Performance Agreement (PA) are then applied to determine the total number of calls to be reviewed through the ambulance call evaluation (ACE) process.

Performance improvement endeavours are essential in the development of a strong system that allows the HSN CPC to examine how the overall patient care system is working and identifies general areas of weakness or concern to enable wide spread change. The HSN CPC continues to develop benchmarks that we measure against and develop continuing medical education (CME), which is disseminated to our paramedics and services, as a means to improving overall system and practitioner quality.

The need and importance of a wide overlap between performance measurement, performance improvement and continuing medical education (Figure 1) is vital to ensure ongoing quality patient care as demonstrated in the well-known and widely used Plan-Do-Study-Act cycle (Figure 2).

Fig. 1

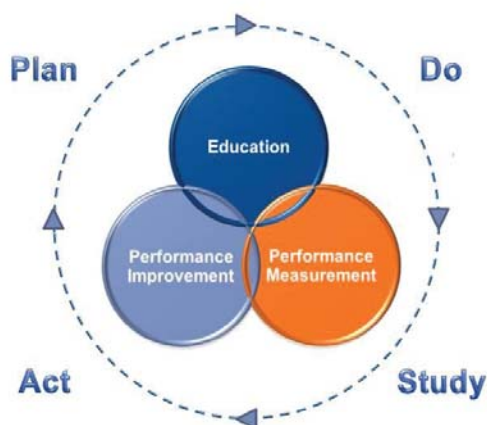

Fig. 2

## QUALITY PROGRAMMING OVERVIEW 2016

### A. PERFORMANCE MEASUREMENT

#### CHART AUDIT PROCESSES

The cases that must be audited fall into 3 categories.

##### 1. Medical Directives/Protocols & Cases

- a) Higher level auditing based on the call type.
- b) Uses a sampling model that addresses both Lower and High Risk call types.
- c) The lower risk (as determined by the HSN CPC Quality of Care Committee) model provides a sampling error of +/- 5% (CI 95%). Refer to PA, Appendix N, Page 80, Table 1.
- d) In cases of higher risk (as determined by the HSN CPC Quality of Care Committee) where a smaller sampling error is desired, a model that provides a sampling error of +/- 2.5% (CI 95%) is used. Refer to PA, Appendix N, Page 81, Table 2.

##### 2. Paramedics

- a) Each Paramedic will have a minimum of 5 charts audited where a controlled act was performed.
- b) If a Paramedic has done < 5 calls where a controlled act was performed, 100% of the calls with controlled acts performed will be audited.
- c) Newly certified Paramedics (defined as paramedics not having previous Base Hospital certification) will have 80% of their charts audited, for the first six (6) months, where a controlled act was performed.

##### 3. Cancelled Calls

- a) A selection of cancelled calls where Paramedics made patient contact, with or without controlled acts performed, will be audited.
- b) Table 1 with the sampling error of +/- 5% (CI 95%) is used for those without controlled acts performed.
- c) Table 2 with the sampling error of +/- 2.5% (CI 95%) is used for those where a controlled act was performed and appropriate refusal occurred.

#### STANDARD REPORTS

Numerous reports are generated to ensure compliance with the PA Chart Audit Process as well as with the ALS/BLS Patient Care Standards. These reports will be shared with the Service Operators and the Ministry of Health and Long-Term Care (MOHLTC) as outlined below. Following receipt, we invite service operators to contact the Performance Measurement Lead to discuss all or any aspects of their service findings within the reports.

##### 1. HSN CPC Audit Requirements and Activities Report

- a) All call types are categorized and the potential skill sets used for each category are listed.

## QUALITY PROGRAMMING OVERVIEW 2016

- b) These are then reviewed by the Quality of Care Committee (QCC) and assigned levels of risk.
- c) A database search is developed, based on call type and skill sets and generated on a weekly basis to identify the call activities throughout each respective area and the appropriate auditing activity is then completed.
- d) This is also a live document and the estimate of call activities and auditing requirements are based on the previous year's activity.
- e) This document is regularly updated and evaluations/comparisons of previous year versus current year call activities are done to ensure compliance with the PA.

### Report Distribution:

- Service Operator
  - Semi-annually for data up to and including September 30 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

## 2. HSN CPC Auditing Requirements - Results

- a) This is a living process that provides up-to-date auditing requirements and activities on a service-by-service and paramedic-by-paramedic basis.
- b) The PPC will update the live document as to the current call activities and ensure appropriate auditing activities are completed.
- c) This live document will then be forwarded to the Performance Measurement Lead who will compile all the data into a service wide report to be shared within as a compliance check.

### Report Distribution:

- Service Operator:
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- NOTE: HSN CPC reports are based on fiscal April 1, 2015 to March 31, 2016 as per Ministry requirements therefore providing calendar year reports, as per service operator requests, may result in incomplete data for the calendar year reports.
- MOHLTC:
  - Annually by June 30.

## QUALITY PROGRAMMING OVERVIEW 2016

---

### 3. Patient Care Variances Report (ACE Outcomes)

- a) All ambulance call evaluations (ACE) with an identified documentation and/or patient care variance will be weighted and tracked.
- b) All variances and error severities will have an identified indicator.
- c) Repetitive errors and/or repetitive practitioners will be reported to the Performance Improvement Lead and Regional Education Coordinator for appropriate action.

#### Report Distribution:

- Service Operator:
  - Monthly for each calendar month throughout the year. These reports will consist of specific data related only to the identified month and every attempt will be made to have them distributed by the first Wednesday of the month following the reporting period.
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

### 4. Online Medical Control Interaction Reports

- a) 'Patch' interactions broken down by service.
- b) 'Patch' interactions broken down by interaction type.
- c) Identified potential/actual failures.

#### Report Distribution:

- Internally:
  - As required.
- Service Operator:
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Patch failures reported upon discovery.
  - Annually by June 30.

## QUALITY PROGRAMMING OVERVIEW 2016

### 5. Service Operator Driven Audit Reports

- a) Identify all ACEs that are completed on request by the Service Operator.

#### Report Distribution:

- Service Operator:
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

### 6. Paramedic Self Reports

- a) Identify number of paramedic self-reports regionally.

#### Report Distribution:

- Service Operator:
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

### 7. BLS Issues Reported to Service Operators

- a) Where BLS PCS issues are discovered during the normal auditing process.

#### Report Distribution:

- Service Operator:
  - As discovered
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

## QUALITY PROGRAMMING OVERVIEW 2016

### 8. Paramedic Skills Activities Report

- a) Skills activities are based on the number of times a paramedic was on a call where an ALS skill was used as part of a patient care plan.

#### Report Distribution:

- Service Operator:
  - Semi-annually for data up to and including September 30 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

## B. PERFORMANCE IMPROVEMENT

### PROCESSES AND REPORTING

#### 1. Investigations

- a) The Performance Improvement Lead will lead and coordinate all patient care related investigations for the HSN CPC.
- b) Appropriate and timely notifications/reports will be shared with all necessary stakeholders.
- c) The Performance Improvement Lead will organize any and all follow-up with both the Performance Measurement Lead and Regional Education Coordinator to ensure outcome recommendations are adhered to.

#### Report Distribution:

- All necessary parties as required
- Service Operator:
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

## QUALITY PROGRAMMING OVERVIEW 2016

### 2. Clinical Audit Reports

Large scale patient care activities audit reports will be undertaken three times per year to evaluate actual performance against predicted benchmarks.

#### Report Distribution:

- Service Operator, Regional and Provincial:
  - By April 30, August 31, and December 31.
- MOHLTC:
  - Annually by June 30.

### 3. Focused Reports

- a) Ad hoc reports responsive to needs as they arise.
- b) Content may be driven from the Quality of Care Committee, HSN CPC Program Committee or Program Council.
- c) Repetitive errors reported by the Performance Measurement Lead will drive to a system audit on specific skills and/or patient care activities.
- d) Implementation of a new or changed directive will lead to a system audit of pre implementation outcomes versus post. This will typically include three months of data on either side of the change.
- e) Results of these audits may be used to drive future year, large scale clinical audits depending on results.
- f) A comprehensive paramedic call review to determine patient care variances (PCV) looking at both commissions and omissions of care will be completed in conjunction with the Regional Education Coordinator to determine the educational needs of the next CME cycle.

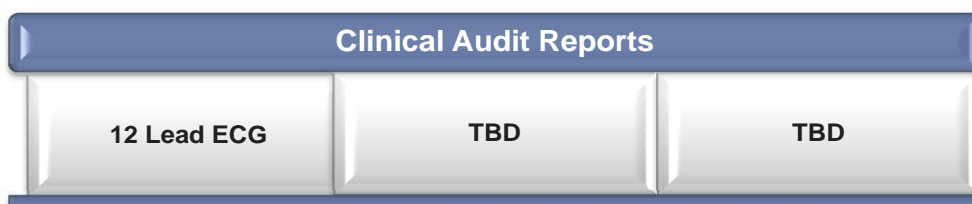

#### Report Distribution:

- Internally
  - As required
- Service Operator, Regional and Provincial:
  - As applicable and as completed.
- MOHLTC:
  - Annually by June 30

## QUALITY PROGRAMMING OVERVIEW 2017

### 2. Clinical Audit Reports

Large scale patient care activities audit reports will be undertaken three times per year to evaluate actual performance against predicted benchmarks.

#### Report Distribution:

- Service Operator, Regional and Provincial:
  - Target: April 30, August 31, and December 31.
- MOHLTC:
  - Annually by June 30.

### 3. Focused Reports

- a) Ad hoc reports responsive to needs as they arise.
- b) Content may be driven from the Quality of Care Committee, HSN CPC Program Committee or Program Council.
- c) Repetitive errors reported by the Performance Measurement Lead will drive to a system audit on specific skills and/or patient care activities.
- d) Implementation of a new or changed directive will lead to a system audit of pre implementation outcomes versus post. This will typically include three months of data on either side of the change.
- e) Results of these audits may be used to drive future year, large scale clinical audits depending on results.
- f) A comprehensive paramedic call review to determine patient care variances (PCV) looking at both commissions and omissions of care will be completed in conjunction with the Regional Education Coordinator to determine the educational needs of the next CME cycle.

#### Report Distribution:

- Internally
  - As required
- Service Operator, Regional and Provincial:
  - As applicable and as completed.
- MOHLTC:
  - Annually by June 30

# APPENDIX C: QUALITY PROGRAMMING OVERVIEW 2017

# QUALITY PROGRAMMING OVERVIEW 2017

## Centre for Prehospital Care

Health Sciences North

[www.hsnsudbury.ca/portalen/basehospital](http://www.hsnsudbury.ca/portalen/basehospital)

## QUALITY PROGRAMMING OVERVIEW 2017

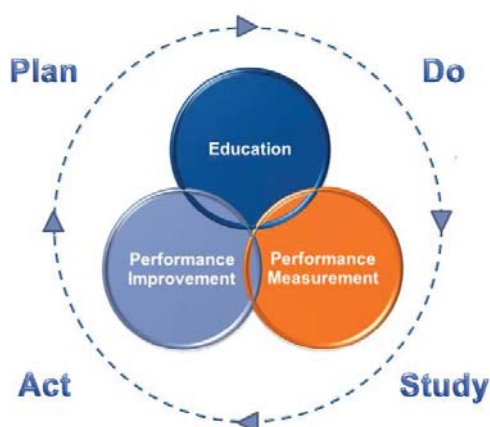

Continuous quality improvement (CQI) is a complex responsibility that requires the collective effort of varied focus areas. Within the Health Sciences North Centre for Prehospital Care (HSN CPC), CQI is attained through an integrated system of performance measurement, performance improvement and continuing medical education within a broad based system of quality management and medical leadership.

Performance measurement is accomplished primarily by collecting and randomly reviewing ambulance call reports (ACRs) where Advanced Life Support (ALS) skill sets were performed and/or not performed when they should have been. Skills and specific patient conditions are categorized as either high or low risk procedures by the Health Sciences North Centre for Prehospital Care (HSN CPC) Quality of Care Committee (QCC). Tables 1 and 2 from Appendix N of the HSN CPC Performance Agreement (PA) are then applied to determine the total number of calls to be reviewed through the ambulance call evaluation (ACE) process.

Performance improvement endeavours are essential in the development of a strong system that allows the HSN CPC to examine how the overall patient care system is working and identifies general areas of weakness or concern to enable wide spread change. The HSN CPC continues to develop benchmarks that we measure against and develop continuing medical education (CME), which is disseminated to our paramedics and services, as a means to improving overall system and practitioner quality.

The need and importance of a wide overlap between performance measurement, performance improvement and continuing medical education (Figure 1) is vital to ensure ongoing quality patient care as demonstrated in the well-known and widely used Plan-Do-Study-Act cycle (Figure 2).

**Fig. 1**

**Fig. 2**

## QUALITY PROGRAMMING OVERVIEW 2017

As we begin our transition to the Intelligent Quality Evaluation and Management Suite (IQEMS) on April 1, 2017, the following sections will be affected based on the new chart audit processes and reporting functionalities. Reporting will be on hold beginning April 1, 2017 as we work through the various reporting functionalities and the new audit practices.

Since this is a living document, the following sections will be updated once the new enhanced auditing and reporting systems are finalized.

### A. PERFORMANCE MEASUREMENT

#### CHART AUDIT PROCESSES

The cases that must be audited fall into 3 categories.

#### 1. Medical Directives/Protocols & Cases

- a) Higher level auditing based on the call type.
- b) Uses a sampling model that addresses both Lower and High Risk call types.
- c) The lower risk (as determined by the HSN CPC Quality of Care Committee) model provides a sampling error of +/- 5% (CI 95%). Refer to PA, Appendix N, Page 80, Table 1.
- d) In cases of higher risk (as determined by the HSN CPC Quality of Care Committee) where a smaller sampling error is desired, a model that provides a sampling error of +/- 2.5% (CI 95%) is used. Refer to PA, Appendix N, Page 81, Table 2.

#### 2. Paramedics

- a) Each Paramedic will have a minimum of 5 charts audited where a controlled act was performed.
- b) If a Paramedic has done < 5 calls where a controlled act was performed, 100% of the calls with controlled acts performed will be audited.
- c) Newly certified Paramedics (defined as paramedics not having previous Base Hospital certification) will have 80% of their charts audited, for the first six (6) months, where a controlled act was performed.

#### 3. Cancelled Calls

- a) A selection of cancelled calls where Paramedics made patient contact, with or without controlled acts performed, will be audited.
- b) Table 1 with the sampling error of +/- 5% (CI 95%) is used for those without controlled acts performed.
- c) Table 2 with the sampling error of +/- 2.5% (CI 95%) is used for those where a controlled act was performed and appropriate refusal occurred.

## QUALITY PROGRAMMING OVERVIEW 2017

### STANDARD REPORTS

Numerous reports are generated to ensure compliance with the PA Chart Audit Process as well as with the ALS/BLS Patient Care Standards. These reports will be shared with the Service Operators and the Ministry of Health and Long-Term Care (MOHLTC) as outlined below. Following receipt, we invite service operators to contact the Performance Measurement Lead to discuss all or any aspects of their service findings within the reports.

#### 1. HSN CPC Audit Requirements and Activities Report

- a) All call types are categorized and the potential skill sets used for each category are listed.
- b) These are then reviewed by the Quality of Care Committee (QCC) and assigned levels of risk.
- c) A database search is developed, based on call type and skill sets and generated on a weekly basis to identify the call activities throughout each respective area and the appropriate auditing activity is then completed.
- d) This is also a live document and the estimate of call activities and auditing requirements are based on the previous year's activity.
- e) This document is regularly updated and evaluations/comparisons of previous year versus current year call activities are done to ensure compliance with the PA.

#### Report Distribution:

- Service Operator
  - Semi-annually for data up to and including September 30 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

#### 2. HSN CPC Auditing Requirements - Results

- a) This is a living process that provides up-to-date auditing requirements and activities on a service-by-service and paramedic-by-paramedic basis.
- b) The PPC will update the live document as to the current call activities and ensure appropriate auditing activities are completed.
- c) This live document will then be forwarded to the Performance Measurement Lead who will compile all the data into a service wide report to be shared within as a compliance check.

## QUALITY PROGRAMMING OVERVIEW 2017

### Report Distribution:

- Service Operator:
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- NOTE: HSN CPC reports are based on fiscal April 1, 2015 to March 31, 2016 as per Ministry requirements therefore providing calendar year reports, as per service operator requests, may result in incomplete data for the calendar year reports.
- MOHLTC:
  - Annually by June 30.

### 3. Patient Care Variances Report (ACE Outcomes)

- a) All ambulance call evaluations (ACE) with an identified documentation and/or patient care variance will be weighted and tracked.
- b) All variances and error severities will have an identified indicator.
- c) Repetitive errors and/or repetitive practitioners will be reported to the Performance Improvement Lead and Regional Education Coordinator for appropriate action.

### Report Distribution:

- Service Operator:
  - Monthly for each calendar month throughout the year. These reports will consist of specific data related only to the identified month and every attempt will be made to have them distributed by the first Wednesday of the month following the reporting period.
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

### 4. Online Medical Control Interaction Reports

- a) 'Patch' interactions broken down by service.
- b) 'Patch' interactions broken down by interaction type.
- c) Identified potential/actual failures.

### Report Distribution:

- Internally:
  - As required.

## QUALITY PROGRAMMING OVERVIEW 2017

---

- Service Operator:
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Patch failures reported upon discovery.
  - Annually by June 30.

## QUALITY PROGRAMMING OVERVIEW 2017

---

### 5. Service Operator Driven Audit Reports

- a) Identify all ACEs that are completed on request by the Service Operator.

#### Report Distribution:

- Service Operator:
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

### 6. Paramedic Self Reports

- a) Identify number of paramedic self-reports regionally.

#### Report Distribution:

- Service Operator:
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

### 7. BLS Issues Reported to Service Operators

- a) Where BLS PCS issues are discovered during the normal auditing process.

#### Report Distribution:

- Service Operator:
  - As discovered
  - Quarterly for data up to and including June 30, September 30, December 31 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

## QUALITY PROGRAMMING OVERVIEW 2017

### 8. Paramedic Skills Activities Report

- a) Skills activities are based on the number of times a paramedic was on a call where an ALS skill was used as part of a patient care plan.

#### Report Distribution:

- Service Operator:
  - Semi-annually for data up to and including September 30 and March 31. Reports will be distributed within the ensuing six weeks.
- MOHLTC:
  - Annually by June 30.

## B. PERFORMANCE IMPROVEMENT

### PROCESSES AND REPORTING

#### 1. Investigations

- a) The Performance Improvement Lead will lead and coordinate all patient care related investigations for the HSN CPC.
- b) Appropriate and timely notifications/reports will be shared with all necessary stakeholders.
- c) The Performance Improvement Lead will organize any and all follow-up with both the Performance Measurement Lead and Regional Education Coordinator to ensure outcome recommendations are adhered to.

#### Report Distribution:

- All necessary parties as required
- MOHLTC:
  - Annually by June 30.

## QUALITY PROGRAMMING OVERVIEW 2017

### 2. Clinical Audit Reports

Large scale patient care activities audit reports will be undertaken three times per year to evaluate actual performance against predicted benchmarks.

#### Report Distribution:

- Service Operator, Regional and Provincial:
  - Target: April 30, August 31, and December 31.
- MOHLTC:
  - Annually by June 30.

### 3. Focused Reports

- a) Ad hoc reports responsive to needs as they arise.
- b) Content may be driven from the Quality of Care Committee, HSN CPC Program Committee or Program Council.
- c) Repetitive errors reported by the Performance Measurement Lead will drive to a system audit on specific skills and/or patient care activities.
- d) Implementation of a new or changed directive will lead to a system audit of pre implementation outcomes versus post. This will typically include three months of data on either side of the change.
- e) Results of these audits may be used to drive future year, large scale clinical audits depending on results.
- f) A comprehensive paramedic call review to determine patient care variances (PCV) looking at both commissions and omissions of care will be completed in conjunction with the Regional Education Coordinator to determine the educational needs of the next CME cycle.

#### Report Distribution:

- Internally
  - As required
- Service Operator, Regional and Provincial:
  - As applicable and as completed.
- MOHLTC:
  - Annually by June 30

# APPENDIX D: EVENT ANALYSIS 2016-2017

## EVENT ANALYSIS REPORT 2016-2017

Incident analysis is a structured process for identifying what happened, how and why it happened, what can be done to reduce the risk of recurrence and make care safer, and what was learned. (<http://www.patientsafetyinstitute.ca>). Ambulance Call Evaluations that require a more in-depth review are escalated to the Quality Improvement Lead for further analysis. For 2016-2017, 47 cases were reviewed of which 40 (85%) involved a medical advisor.

| No of Escalated Files | No of Closed Files | Average Duration to close a file (d) | Reviewed by Medical Director |
|-----------------------|--------------------|--------------------------------------|------------------------------|
| 47                    | 45 (96%)           | 42                                   | 40 (85%)                     |

| ACE Escalation by  | Number of Cases | %           |
|--------------------|-----------------|-------------|
| Audit Process      | 27              | 58%         |
| Audit Huddles      | 13              | 28%         |
| Hospital Personnel | 3               | 6%          |
| Service Provider   | 2               | 4%          |
| Self-Report        | 1               | 2%          |
| MoHLTC             | 1               | 2%          |
| <b>Grand Total</b> | <b>47</b>       | <b>100%</b> |

| Result of Case Review - Base Hospital Outcome          | Number of Cases | %           |
|--|-----------------|-------------|
| None   | 18              | 38%         |
| Open   | 2               | 4%          |
| Patch Failure - Technical                              | 2               | 4%          |
| Resolved Through Clinical Interview                    | 2               | 4%          |
| Resolved Through Discussion                            | 6               | 13%         |
| Resolved Through Remedial Action                       | 10              | 21%         |
| Resolved with Directional and/or Educational Statement | 6               | 13%         |
| Unable to substantiate variance                        | 1               | 2%          |
| <b>Grand Total</b>                                     | <b>47</b>       | <b>100%</b> |

| Medical Directive                        | Number of Cases | %           |
|--|-----------------|-------------|
| ACP Adult Analgesia                      | 2               | 4%          |
